

File Director 4.5

Release Notes

Components in this Release

Component	Version
Appliance Configuration Services	4.5.0.3
Appliance Plugins	4.5.0.1
Appliance Text Console	4.3.0.7
Server	4.5.0.29
Web Client	4.5.0.1
Web Admin	4.5.0.1
Windows Client	4.5.22.0

Important Upgrade Information

Windows Client

File Director 4.x Agent now requires Windows 7 SP1 or above. In addition, Windows 7 SP1 must be updated to support SHA-256.

Note

For details of Windows 7 SP1 SHA-256 requirements, please refer to the following [community article](#).

OneDrive Technical Previews

Upgrade to File Director 4.5 from any technical preview installation is not supported.

New Features

Bidirectional OneDrive Synchronization

Previously changes made to files on File Director map points using OneDrive for Business clients were not synchronized with the File Director desktop and mobile clients.

With this release of File Director updates made to files on map points using any File Director client or by using the OneDrive for Business web or desktop clients are now synchronized. Resulting in the changes being evident whether the file is accessed using either the File Director or OneDrive for Business clients.

Bugs Fixed

The following bugs have been resolved in this release:

ID	Title
14147	Exclusions – error when new file exists on share
14281	File with apostrophe is not syncing to OneDrive
56799	Start Menu issues with File Director Service
58769	Security Vulnerability - SSL 64-bit Block Size Cipher Suites Supported
