

Performance Manager

Release Notes (Version 10.0)

These release notes include:

- [Components in this Release](#)
- [New Features](#)
- [Known Issues and Limitations](#)
- [Supported Operating Systems and Technologies](#)
- [Required Utilities and Components](#)

Components in this Release

Component	Version	File Name
Agent	10.0.519.0	PerformanceManagerAgent32.msi
		PerformanceManagerAgent64.msi
Console	10.0.519.0	PerformanceManagerConsole32.msi
		PerformanceManagerConsole64.msi

New Features

Windows Client

Support for Windows XP, Windows Vista and Windows Server 2008 has been deprecated for the Performance Manager Agent, therefore, the Performance Manager 10.0 Agent now requires Windows 7 SP1 or above and Windows Server 2008 R2 SP1 or above. The [Microsoft Security Advisory KB3033929](#) should also be applied to Windows 7 SP1 and Windows Server 2008 R2 SP1 Endpoints before attempting to install the 10.0 Agent. Microsoft extended support for Windows XP ended on 8th April 2014, mainstream support for Windows Vista ended on 10th April 2012.

Updated Console UI

The Performance Manager Console has been updated with a new User Interface.

New Server-Based Help

A new product Help system is available via www.appsense.com/help/pm/v10.0/ and is no longer delivered via a documentation MSI for local installation. The Help system can be accessed via the URL or from within the product console for context specific content.

For those that cannot access the internet a PDF version of the Help is available as a Product Guide in the release media.

If you are upgrading a previous product version using the Suite Installer that product documentation will be uninstalled.

All version 10.0 product documentation can be found at www.appsense.com/help.

Known Issues and Limitations

The known issues and limitations are now detailed on AppSense Support. Navigate to <http://support.appsense.com> log in and select **Self Service > Known Issues**

Supported Operating Systems and Technologies

The supported Operating Systems and Technologies are now detailed in a compatibility matrix available on <http://www.appsense.com/kb/150716072503426>
