

# Performance Manager 10.1 FR2

## Release Notes

### Components in this Release

Component	Version
Agent	10.1.319.0
Console	10.1.319.0

## Important Upgrade Information

This upgrade section contains functionality changes that have been introduced in either Performance Manager v10.0 or v10.1. Any information that is new to this release will be specifically listed as Performance Manager v10.1 FR2.

**Note**

We are including this extended information for the convenience of customers upgrading from an 8.x version.

### Windows Client

Support for Windows XP, Windows Vista and Windows Server 2008 has been deprecated for the Performance Manager Agent, therefore, the Performance Manager 10.0 Agent now requires Windows 7 SP1 or above and Windows Server 2008 R2 SP1 or above.

Microsoft extended support for Windows XP ended on 8<sup>th</sup> April 2014, mainstream support for Windows Vista ended on 10<sup>th</sup> April 2012.

In addition, both Windows 7 SP1 and Windows Server 2008 R2 SP1 must be updated to support SHA-256.

**Note**

For details on SHA-256 requirements, please refer to the following [community article](#).

## What's New?

### Console Rebrand

The Performance Manager console has been updated to reflect that it is now part of the User Workspace Manager suite, formerly known as DesktopNow.

You may still see references to the 'DesktopNow' name used in certain areas, such as the Registry or Windows Services. This is to make the transition as least disruptive as possible for existing users of Performance Manager.

## Known Issues and Limitations

The known issues and limitations are now detailed on [community.ivanti.com](http://community.ivanti.com).

## Supported Operating System and Technologies

The maintained Operating Systems and Technologies are now detailed in a [maintained platform matrix](#).
