- [How to Contact Us](#)

Contents

The *System Requirements and Compatibility Matrix for Ivanti Service Manager Release 2017.1* is intended for Ivanti Service Manager administrators who are going to install Ivanti Service Manager.

This document contains the following sections:

- [Hardware and Software Requirements](#). Contains the hardware and software requirements.
- [About Third-Party Software](#). Discusses third-party software that is used in Ivanti Service Manager.
- [Port Requirements](#). Lists the required ports.
- [Compatibility Matrix](#). Lists the compatibility of Ivanti Service Manager Release 2017.1 with other software.
- [Troubleshooting](#). Contains solutions to common problems related to system requirements.

Related Documentation

Ivanti Service Manager has online help available within the application.

The following additional documentation is available in the Knowledge Base. See [Accessing the Knowledge Base](#) for information about how to access these documents.

Accessing the Knowledge Base

All Ivanti Service Manager Release 2017.1.1 documents are located in the Knowledge Base. Contact your Ivanti Service Manager administrator for your credentials.

To access the Ivanti Service Manager Knowledge Base, do the following:

1. Navigate to <https://support.heatsoftware.com>.
2. Do the following:
 - a. Enter your user name and password.
 - b. Press **Login**.

The system may require you to log in using external authentication. If so, enter your user name and click **Sign in with your_company_name**.

3. If the system prompts you, select a role and click **Submit**. The system opens to your home page.
4. From the top tool bar, click **Knowledge**. If you do not see it, click **More...** and select **Knowledge**. You are now in the Ivanti Service Manager Knowledge Base.
5. To search for a specific article number, in the search box, enter the knowledge article number and press **Enter**.

How to Contact Us

To contact us about the documentation, or if you have any other questions or issues about Ivanti Service Manager, contact Ivanti support services by logging an incident via Self Service at:

<https://www.ivanti.com/support/ivanti-support>.

Hardware and Software Requirements

- Application Server Requirements
- Web Server Requirements
- Database Server Requirements
- Reporting Feature Requirements
- Discovery Requirements
- Client Computer Requirements

Application Server Requirements

- Hardware
- Software

Hardware

Component	Recommended
CPU	<ul style="list-style-type: none"> ■ 2 core minimum ■ 4 core recommended for heavy transaction rates and workflow/escalation usage
RAM	<ul style="list-style-type: none"> ■ 8 GB minimum, and more depending on transaction rates and workflow/escalation complexity
Hard Disk	<ul style="list-style-type: none"> ■ 20 GB minimum free space (approximately 1.1 GB for Ivanti Service Manager files and the remaining space for log files). <i>Best Practice!</i> We recommend that you install Ivanti Service Manager in a location other than on the system drive (typically the C drive).

Software

Item	Supported Version
Operating System	<ul style="list-style-type: none"> ■ Microsoft Windows Server 2012 R2 (recommended) ■ Microsoft Windows Server 2012 ■ Microsoft Windows Server 2008 R2 x64 SP1 ■ Microsoft Windows Server 2008 R2 x64 SP2

Item	Supported Version
Microsoft .NET Framework	<ul style="list-style-type: none"> ■ Microsoft .NET Framework Release 4.6. <p>NOTE: This requires the latest Microsoft Windows update or that you download the following security patch: https://www.microsoft.com/en-us/download/details.aspx?id=42327.</p>
Web Server	<ul style="list-style-type: none"> ■ Microsoft IIS Release 7.5 ■ Microsoft IIS Release 8.0 ■ Microsoft IIS Release 8.5 (recommended)

Web Server Requirements

- Hardware
- Software

In multi-server environments, each Ivanti Service Manager web server must meet these requirements.

Hardware

Component	Recommended
CPU	<ul style="list-style-type: none"> ■ 2 core minimum ■ 4 core recommended for heavy transaction rates and workflow/escalation usage
RAM	<ul style="list-style-type: none"> ■ 8 GB minimum, and more depending on transaction rates and workflow/escalation complexity
Hard Disk	<ul style="list-style-type: none"> ■ 20 GB minimum free space (approximately 1.1 GB for Ivanti Service Manager files and the remaining space for log files). <p><i>Best Practice!</i> We recommend that you install Ivanti Service Manager in a location other than on the system drive (typically the C drive).</p>

Software

Item	Supported Version
Operating System	<ul style="list-style-type: none"> ■ Microsoft Windows Server 2012 R2 (recommended) ■ Microsoft Windows Server 2012 ■ Microsoft Windows Server 2008 R2 x64 SP1 ■ Microsoft Windows Server 2008 R2 x64 SP2
Microsoft .NET Framework	<ul style="list-style-type: none"> ■ Microsoft .NET Framework Release 4.6. <p>NOTE: This requires the latest Microsoft Windows update or that you download the following security patch: https://www.microsoft.com/en-us/download/details.aspx?id=42327.</p>
Web Server	<ul style="list-style-type: none"> ■ Microsoft IIS Release 7.5 ■ Microsoft IIS Release 8.0 ■ Microsoft IIS Release 8.5 (recommended)

Database Server Requirements

- [Hardware](#)
- [Software](#)

Hardware

Component	Recommended
CPU	<ul style="list-style-type: none"> ■ 4 core minimum. Your deployment may require more for heavy transaction rate and workflow or escalation usage
RAM	<ul style="list-style-type: none"> ■ 16 GB minimum; however, your deployment may require much more RAM depending on transaction rates and workflow or escalation complexity

Component	Recommended
Hard Disk	<ul style="list-style-type: none"> ■ Best Practice! We recommend that you have separate volumes for the database and the transaction logs. ■ Database: 100 GB minimum free space. For proper disk space sizing, use these guidelines: <ul style="list-style-type: none"> ■ Ivanti Service Manager application demo database: 500 MB ■ Average disk space requirement per record (incident, problem, change, configuration): ~200 KB ■ For storing records more than three years old: more than 60 GB ■ Average disk space requirement per record (configuration item): ~500 KB. For example, for 20,000 configuration items, we recommend a minimum of 10 GB. ■ 10 GB minimum free space. This is the minimum. ■ Transaction logs: 60 GB minimum free space.

Software

If your deployment has the reporting feature installed, you must have Microsoft .NET Framework Release 4.6, which requires the latest Microsoft Windows update or that you download the following security patch: <https://www.microsoft.com/en-us/download/details.aspx?id=42327>.

Item	Supported Version
Operating System	■ Microsoft Windows Server 2012 R2 (recommended)
	■ Microsoft Windows Server 2012
	■ Microsoft Windows Server 2008 R2 x64 SP1
	■ Microsoft Windows Server 2008 R2 x64 SP2

Item	Supported Version
Database Management Software	<ul style="list-style-type: none"> Microsoft SQL Server 2012 including Management Studio and full-text search
	<ul style="list-style-type: none"> Microsoft SQL Server 2012 SP2 including Management Studio and full-text search
	<ul style="list-style-type: none"> Microsoft SQL Server 2014 including full-text search
Other Software	<ul style="list-style-type: none"> iFilters (required for full-text indexing)
	<ul style="list-style-type: none"> An iFilter is a plugin that allows the Microsoft SQL Server to index various file formats so that they become searchable. Download the latest version of the iFilter for the document type (these links are subject to change):
	<ul style="list-style-type: none"> Microsoft Office 2007: http://www.microsoft.com/en-us/download/details.aspx?id=20109
	<ul style="list-style-type: none"> Microsoft Office 2010: http://www.microsoft.com/en-us/download/details.aspx?id=17062 Adobe PDF iFilter 64 Release 11.0.01: http://www.adobe.com/support/downloads/detail.jsp?ftpID=5542

Microsoft SQL Server must have full-text search enabled. If it does not, the Ivanti Service Manager demo database will not load properly.

Reporting Feature Requirements

- Hardware
- Software
- Microsoft SSRS Report Designer

Hardware

Component	Recommended
CPU	<ul style="list-style-type: none"> 2 core minimum 4 core recommended for heavy transaction rates and workflow and escalation usage
RAM	<ul style="list-style-type: none"> 8 GB minimum, and more depending on transaction rates and workflow and escalation complexity

Component	Recommended
Hard Disk	<ul style="list-style-type: none"> 20 GB minimum free space (approximately 1.1 GB for Ivanti Service Manager files and the remaining space for log files). <p><i>Best Practice!</i> We recommend that you install Ivanti Service Manager in a location other than on the system drive (typically the C drive).</p>

Client Computer Requirements

- Hardware
- Mobile
- Software
- Remote Control Feature
- Bandwidth and Latency

Hardware

Component	Recommended
CPU	Single core
RAM	4 GB

Mobile

Ivanti Service Manager is compatible with mobile devices and many mobile operating systems, including Android, iOS, and Windows. We highly recommend having a minimum of 1024x768 resolution, which makes tablets a better choice for use as a mobile browser than mobile phones.

Software

All browsers must support Adobe Flash, which is required to use dashboard charting, pivoting, copy and paste control, and Service Catalog attachment control.

Browser	Supported Version
Google Chrome	<p>Ivanti Service Manager only supports the latest production version (not including beta versions).</p> <p>Download and install the ClickOnce extension at https://chrome.google.com/webstore/detail/meta4-clickonce-launcher/jkncabbipkgbconhaajbapbhokpbgkdc?hl=en to ensure that the Ivanti Service Manager reporting feature works correctly.</p>
Mozilla Firefox	<p>Ivanti Service Manager supports the following combinations:</p> <ul style="list-style-type: none">■ Firefox 3.0 on MAC OS 10.5■ Firefox 3.5 on MAC OS■ Firefox 3.5 or later on Windows <p>Download and install the Microsoft .NET Framework assistant extension from https://addons.mozilla.org/en-US/firefox/addon/9449 to ensure that the Ivanti Service Manager reporting feature works correctly.</p>

Browser	Supported Version
Microsoft Internet Explorer	<p>Ivanti Service Manager supports Microsoft Internet Explorer versions 9.0 and later. Apply all Microsoft hot fixes.</p> <p>Ensure that Ivanti Service Manager runs properly by doing the following:</p> <ul style="list-style-type: none"> ■ Go to the Tools > Internet Options > Security > Custom level page. ■ Set the following options to enable: <ul style="list-style-type: none"> ■ Run ActiveX controls and plug-ins ■ File download ■ Scripting > Active scripting <p>Ensure that Microsoft SSRS can open by saving the website as a trusted site. Do the following:</p> <ul style="list-style-type: none"> ■ Go to the Tools > Internet Options > Security page. ■ Highlight Trusted sites and click Sites. ■ Click Add.
Microsoft Edge	<p>Ivanti Service Manager only supports the latest production version (not including beta versions).</p>
Microsoft .NET Framework	<p>To use the Microsoft SSRS Report Designer, install Microsoft .NET Framework Release 3.5 SP1.</p>

Remote Control Feature

The remote control feature requires that your browsers enable either TLS 1.0 or TLS 1.1 to support the HTTPS connection between the clients and the remote control server.

Bandwidth and Latency

For optimal application performance, we recommend a latency of 110 ms or below with a minimum of 1.5 MBits/sec in bandwidth between the Ivanti Service Manager application server and the remote location client machines.

About Third-Party Software

- [Third-Party Software Components](#)
- [Third-Party Software Support](#)

Third-Party Software Components

The Ivanti Service Manager installation package provides the following required third-party software components:

- Microsoft .NET Framework Release 4.6
- Microsoft SQL Server 2012 Management Object (SMO) (redistributable)
- Microsoft Access Database Engine 2007 and 2010 (redistributable)
- Microsoft Windows Server Roles and Features

If the installer does not detect these components on the host system, they are installed automatically.

If you create your own installation packages for remote deployment, include the software components that are listed in the system requirements that follow.

Third-Party Software Support

Ivanti relies on, and integrates with, many different third-party applications.

Ivanti Software regularly performs quality assurance testing in the interactions between Ivanti Service Manager and these applications. Our policy is to support any tested version of a third-party application (as certified) and newer versions (as compliant), so long as the third-party vendor claims and maintains backward compatibility.

If Ivanti Software becomes aware that a third-party vendor has not maintained backward compatibility to the most recent certified version, Ivanti Software notes this in the compatibility matrix as an exception.

Ivanti Service Manager does not support third-party applications that are older than a certified version. Ivanti Software often certifies more than one version of third-party software when more than one version is in common use; otherwise, the current generally available version is used during each Ivanti Software version quality assurance cycle.

Port Requirements

Ensure that ports are configured correctly so that all Ivanti Service Manager components open correctly.

- [For All Deployments](#)
- [For Deployments With All Components Installed on One Host](#)
- [For Deployments with the Web Server Installed on a Different Host](#)
- [For Deployments that Include Discovery](#)
- [For Deployments with Remote Control](#)

For All Deployments

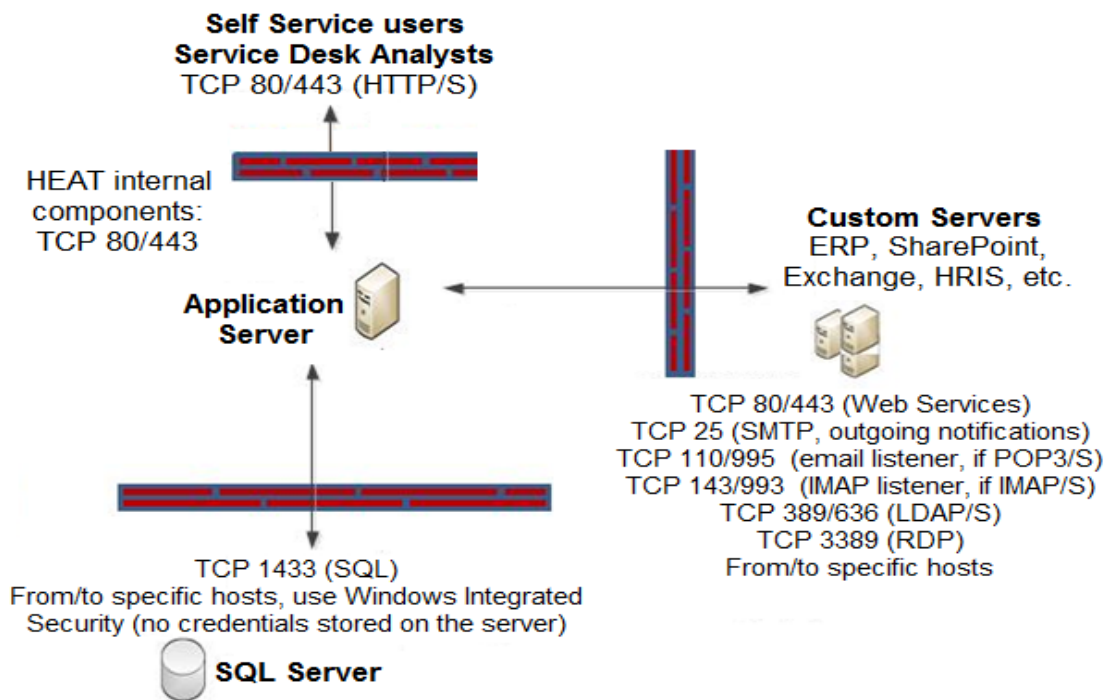

For all deployments, we recommend that you open the following ports:

Port	Service
53	For Active Directory. Select the UDP (for DNS) or TCP protocol.
139 or 445	For deploying agents to other computers. Select the UDP (for DNS) or TCP protocol.
443	For sending surveys. However, port HTTPS 7075 is supported until further notice.
1433	For the Discovery application server.
2323	Ivanti Service Manager Voice web services port: Set to match the web services port set in the Ivanti Service Manager Voice management portal.
5743	For the Ivanti Service Manager Voice server.
5986	For WinRM to receive remote commands.
8097	The default proxy port. Used unless defined in the endpoint address. For example, <code>http://company/users:8113</code> .
8523	For the message queue.
61000	The public TCP port of the Ivanti Service Manager Voice message server service.
62000	The public TCP port of the Ivanti Service Manager Voice reset password service.

For Deployments With All Components Installed on One Host

[Port Configuration](#) shows the port requirements for a deployment where all Ivanti Service Manager components are installed on one host.

Fig. 1. Port Configuration

The ports to open are as follows:

- Self Service users and Service Desk Analysts:
 - TCP 80/443 (HTTP/HTTPS)
- Ivanti Service Manager application server (Ivanti Service Manager internal components):
 - TCP 80/443
- Custom servers (ERP, SharePoint, Exchange, HRIS, and so on):
 - TCP 80/443 (web services)
 - TCP 25 (SMTP, outgoing notifications)
 - TCP 110/995 (Email listener if POP3/S is used)
 - TCP 143/993 (IMAP listener, if IMAP/S is used)
 - TCP 389/636 (LDAP/S)
 - TCP 3389 (RDP)
- Microsoft SQL Server:
 - TCP 1433 (SQL)

To and from specific hosts, use Windows Integrated Security. No credentials are stored on the server.

The outbound port may not be the same as the inbound port. The outbound is determined by your environment.

For Deployments with the Web Server Installed on a Different Host

If your deployment has the Ivanti Service Manager web server outside of the firewall, ensure that the following ports are also open:

- TCP 80/443
- TCP 25 (SMTP, outgoing notifications)
- TCP 1433 (SQL)
- TCP 54327 (License)
- TCP 389/636 (LDAP/S)

For Deployments that Include Discovery

For additional information about the Discovery requirements, see the Ivanti Service Manager online help and look for the topic called "Standard Gateway System Prerequisites". See [Related Documentation](#) for information on accessing the Ivanti Service Manager documentation.

- [About the Discovery Servers](#)
- [Port Information](#)

About the Discovery Servers

The Discovery components reside on two servers: the Discovery web server and the Discovery application server. You can view the components that are deployed to each server from Microsoft IIS.

- The [AgentTaskWs](#) and [ClientTransportProcessor](#) components reside on the Discovery web server.
- The [MessageSender](#), [AssetProcessor](#), [DiscoProcessor](#), and [TaskProcessor](#) components reside on the Discovery application server.

All communication from the gateway or client agent goes to the [AgentTaskWs](#) and [ClientTransportProcessor](#) components (on the Discovery web server), and those components then relay the messages or requests to the corresponding components on the Discovery application server.

Commands sent to the [AgentTaskWs](#) component are relayed to the [TaskProcessor](#) component via Net.TCP on port 7100.

Asset and Discovery data sent to the [ClientTransportProcessor](#) component is forwarded to the message sender via Net.TCP on port 5000. The message sender component then queues the message on one of the processor queues depending on the message type; you do not need to open a particular port for this.

Port Information

If your deployment includes Discovery, ensure that the following ports are also open for the Discovery application server:

- TCP 8080
- TCP 5000
- TCP 8382
- TCP 7100

For Deployments with Remote Control

To use the remote control feature without the plugin (using HTML5), port 11438 must be opened. For more information about the remote control feature, see the Ivanti Service Manager online help. (See [Related Documentation](#) for information about accessing the Ivanti Service Manager documentation, including the online help.)

Compatibility Matrix

See also [About Third-Party Software](#).

- Legend
- Server Compatibility
- Microsoft .NET Framework
- Web Servers

Therefore, if you want to use the Remote Control Client or Remote Control Operator Console plugins, you have to download and install their executable files first. For more information about the remote control feature, see the Ivanti Service Manager online help. (See Related Documentation for information about accessing the Ivanti Service Manager documentation, including the online help.) For information about enabling support for the plugins, see https://www.chromium.org/developers/npapi-deprecation?pli=1.</p>	
Apple Safari	NT

Troubleshooting

If you have problems with your installation or deployment, check this section first.

Problem

The Ivanti Service Manager web servers do not work correctly.

Possible Cause

In multi-server environments, each Ivanti Service Manager web server must meet the system requirements.

Solution

See [Web Server Requirements](#).

Problem

I am unable to use integrated components, such as Ivanti Service Manager Voice.

Possible Cause

You must use the Microsoft Windows operating system when you use integrated components.

Solution

Change to the Microsoft Windows operating system. See [Client Computer Requirements](#).

Problem

I am using Google Chrome and cannot download or edit reports.

Possible Cause

You have not installed the ClickOnce extension yet.

Solution

Install the ClickOnce extension for Google Chrome. Navigate to <https://chrome.google.com/webstore/detail/meta4-clickonce-launcher/jkncabbipkgbconhaajbapbhokpbgkdc?hl=en> to download the extension. See [Client Computer Requirements](#).

Problem

I am using Mozilla Firefox and cannot download or edit reports.

Possible Cause

You have not installed the Microsoft .NET Framework assistant extension yet.

Solution

Install the Microsoft .NET Framework assistant extension. Navigate to <https://addons.mozilla.org/en-US/firefox/addon/9449> to download the extension. See [Client Computer Requirements](#).

Problem

I am using Microsoft Internet Explorer and cannot download files or run controls.

Possible Cause

You did not enable scripting.

Solution

Set properties in Microsoft Internet Explorer as follows:

1. Go to the [Tools > Internet Options > Security > Custom level](#) page.
2. Set the following options to **enable**:
 - **Run ActiveX controls and plug-ins**
 - **File download**
 - **Scripting > Active scripting**

Problem

I am using Microsoft Internet Explorer and cannot open websites.

Possible Cause

You have not set Ivanti Service Manager to be a trusted site.

Solution

Set properties in Microsoft Internet Explorer as follows:

1. Go to the [Tools > Internet Options > Security](#) page.
2. Highlight **Trusted sites** and click **Sites**.
3. Click **Add**.
