## About this Release

### Build Information

These release notes support the General Availability (GA) version of Ivanti Patch for SCCM 2019.1. The GA version can be downloaded from this link:

<https://go.ivanti.com/Web-Download-Patch-SCCM.html>

The GA build is 2.4.34047.0.

New and existing customers should download and install Patch for SCCM 2019.1. If you are currently running Patch for SCCM 2.3 or Patch for SCCM 2.4. (Gold, Update 1 or Update 2), you should upgrade to Patch for SCCM 2019.1 using the full installer.

### New Prerequisite for the File Downloader Script

If you use the File Downloader PowerShell script to help manage your files in a disconnected network, please note that Windows Management Framework is a new prerequisite.

### Documentation

The complete library of Ivanti Patch for SCCM 2019.1 documentation is available here:

## New Features

### Support for Multiple Scheduled Tasks

You are now able to create multiple recurring scheduled tasks for each console. Previous versions limited the number of scheduled tasks to one per user on each console. Beginning with 2019.1, each user can now create multiple scheduled tasks on each console. In addition, scheduled tasks will be shared by all users who have elected to share settings.

### High DPI Support

The dialogs within the product have been updated to support dynamic display scale factor (a.k.a. DPI). This allows the plug-in to automatically and properly scale for each display it is viewed on.

### Windows Server 2019 Support

Windows Server 2019 (excluding Server Core and Nano Server) is now a supported operating system for the console machine.

## Resolved Issues

The following customer support issues have been resolved in this release:

Problem ID	Title
482854	Resolved an issue where the Superseded list in the bottom pane did not refresh when a selection was changed within the grid in the top pane.
538548	Resolved an issue where the Ivanti catalog failed to load when launching the Patch for SCCM plugin.
