## About this Release

### Build Information

These release notes support the General Availability (GA) version of Ivanti Patch for SCCM 2020.1 Update 4. The GA version can be downloaded from this link:

<https://go.ivanti.com/Web-Download-Patch-SCCM.html>

The GA build is 2.4.34291.0.

New and existing customers should download and install Patch for SCCM 2020.1 Update 4. If you are currently running Patch for SCCM 2020.1 (Gold – Update 3), 2019.2, 2019.1 or 2.4, you should upgrade to Patch for SCCM 2020.1 Update 4 using the full installer.

### New Prerequisite for the File Downloader Script

If you use the File Downloader PowerShell script to help manage your files in a disconnected network, please note that Windows Management Framework is a new prerequisite. This change was introduced in Patch for SCCM 2019.2.

### New System Requirements (as of 2020.1)

- A SQL Server database is now mandatory, and each user must have read/write permission to the database. You can use any version of SQL Server that is supported by Microsoft's System Center Configuration Manager.
- Access to the following URL is required in order to download the new Application catalog:

<https://application.ivanti.com>

### Documentation

The complete library of Ivanti Patch for SCCM 2020.1 Update 4 documentation is available here:

## Resolved Issues

### 2020.1 Update 1 (September 2020)

Problem ID	Title
714965	Resolved an issue where the Patch for SCCM toolbar buttons would become disabled when accessing a different area within System Center Configuration Manager.
719676	Resolved an issue where the program would incorrectly force proxy credentials to be required when the <b>Use proxy</b> check box was enabled on the <b>Proxy</b> tab of the <b>Settings</b> dialog.
725595	Resolved an issue where duplicate categories would be displayed in the Manage Products dialog after upgrading to 2020.1.
726687	Resolved an issue where using the Data Migration Tool during an upgrade would fail if duplicate entries were contained in an alert subscription list.
729832	Resolved an issue where certain software updates could not be downloaded if they required a token-based download.

### 2020.1 Update 2 (September 2020)

Problem ID	Title
741304	Resolved an issue where the console would crash after responding to a warning message about an expiring certificate.
742767	Resolved an issue where the console would crash due to a database exception that occurred when processing metadata revisions in the Ivanti Catalog.
744545	Resolved an issue where the console would crash when, during an attempt to publish an update, an inadvertent request for credentials was made by the program.

### 2020.1 Update 3 (October 2020)

Problem ID	Title
747970	Resolved an issue where a publication task would remain in a scheduled state due to a Newtonsoft.json load error.

### 2020.1 Update 4 (November 2020)

Problem ID	Title
754452	Resolved an issue where the console would crash when attempting to load the incorrect Newtonsoft.json.dll.
