

# Ivanti Patch for MEM 2020.2 Update 4

## Release Notes

[About this Release](#)

[Resolved Issues](#)

## About this Release

Ivanti Patch for SCCM has been renamed to Ivanti Patch for Microsoft Endpoint Manager (MEM).

### Build Information

These release notes support the General Availability (GA) version of Ivanti Patch for MEM 2020.2 Update 4. The GA version can be downloaded from this link:

<https://go.ivanti.com/Web-Download-Patch-MEM.html>

The GA build is 2.4.34362.0.

New and existing customers should download and install Patch for MEM 2020.2 Update 4. If you are currently running Patch for MEM 2020.2 (Gold – Update 3) or Patch for SCCM 2020.1, 2019.2 or 2019.1, you should upgrade to Patch for MEM 2020.2 Update 4 using the full installer.

**Note:** If you are using a version older than 2019.1, you must upgrade to 2020.1 Update 4 before upgrading to 2020.2.

### New System Requirements

- A minimum of 4 GB of RAM on your Microsoft Endpoint Configuration Manager console is now recommended.
- The minimum supported version of Configuration Manager is 1906 for anyone using the new Intune capabilities.
- As of Patch for SCCM 2020.1, a SQL Server database is now mandatory, and each user must have read/write permission to the database. You can use any version of SQL Server that is supported by Microsoft Endpoint Configuration Manager.
- Access to the following URL is required in order to import third-party application to Intune and to automatically update the deployed applications:  
<https://application.ivanti.com>

### Documentation
