Table of Contents

Important Information

Read the following information before continuing with installing or upgrading Ivanti Patch for Configuration Manager.

Build Information

These release notes support the General Availability (GA) version of Ivanti Patch for Configuration Manager 2023.4.1. The GA build is 2.5.705.0 and it can be downloaded from the [download page](#).

New and existing customers should download and install Patch for Configuration Manager 2023.4.1. If you are currently running Patch for SCCM 2020.1 or later, including all versions of Patch for MEM or Patch for Configuration Manager, upgrade to Patch for Configuration Manager 2023.4.1 using the full installer.

NOTE: If you are using a version older than 2019.1, you must upgrade to 2020.1 Update 4 before upgrading to 2023.4.1.

System Requirements

See the Patch for Configuration Manager help for details of the system requirements.

What's New

The following features and improvements were introduced in Ivanti Patch for Configuration Manager 2023.4.

Download Status shown in the Updates grid

You can now add a new column, **Is Downloaded**, to the Updates grid. This column identifies updates that have been downloaded to the file system, but not published to WSUS. This is particularly useful if you have set up your environment for offline downloads.

Product icons

Product icons in title bars and the **Ivanti Patch** folder in Configuration Manager have been updated.

Bug Fixes

2023.4.1

The following customer support issues have been resolved in this release:

Problem ID	Title
94775	Fixed an issue where Download URLs were not visible for applications that need sideloading.
98420	Resolved an issue where Application Synchronization had incorrect file version information for Azul Zulu JRE 17 & PDF XChange Pro
99174	Resolved an issue where clicking Sideload Update in the console caused it to crash when using Configuration Manager 2303.
99199	Resolved an issue where the plugin was failing after upgrading when using Configuration Manager 2303.

2023.4

The following customer support issues have been resolved in this release:

Problem ID	Title
94775	Resolved an issue where some sideloading patch versions would not appear in the Sideload Applications dialog.
94569	Resolved an issue where WsusCatalog2.zip could return "Getting the latest catalogs..." when downloading Patch Updates.
