# About Tunnel

Tunnel enables VPN capability on iOS devices. Tunnel interacts with the Unified Endpoint Management (UEM) platform, Standalone Sentry, and Access to secure access to enterprise resources from outside the enterprise network. The enterprise resource can be on premise or in the cloud. The UEM platforms are: Core and Cloud.

## About these release notes

These release notes contain only issues, which are particular to this patch release. For the complete release notes, including new feature and support and compatibility information, see the release notes for the major release.

## Resolved issues

For resolved issues fixed in previous releases, see the "Resolved issues" section in the release notes for those releases.

This release includes the following resolved issue:

- **IAVPN-1915:** Previously, Tunnel crashed when Microsoft Teams could not reconnect through Tunnel after a network switch.  
This issue is now fixed.
