About Tunnel

Tunnel enables VPN capability on Android (native, with no containerization), Android Enterprise (containerized, previously called Android for Work), and Samsung Knox Workspace (containerized) devices.

Tunnel interacts with the Unified Endpoint Management (UEM) platform, Standalone Sentry, and Access to allow apps and browsers on Android, Android Enterprise, and Samsung Knox devices to securely access enterprise resources from outside the enterprise network. The enterprise resource can be on-premise or in the cloud. Ivanti provides the following UEM platforms: Core and Cloud.

About these release notes

These release notes contain only issues, which are particular to this patch release. For the complete release notes, including new feature and support and compatibility information, see the release notes for the major release.

Resolved issues

For resolved issues fixed in previous releases, see the "Resolved issues" section in the release notes for those releases.

This release includes the following resolved issues:

- **TA-1416:** Previously, some intermittent connectivity issues were observed. This issue is now fixed.
