About MobileIron Provisioner

The MobileIron Provisioner app allows admins to easily set up Android work-managed devices (also known as "device owner mode") which are company-owned devices that may or may not have a work profile. This app allows admins to enroll devices with QR codes.

New feature summary

Support for bulk enrollment: Bulk enrollment is now supported for devices being provisioned as a work profile on company-owned device when using Provisioner.

For more information about MobileIron Provisioner, see the "Provisioning an Android enterprise device" section of the *MobileIron Core Device Management Guide for Android and Android enterprise Devices*, available by searching [here](#).

Support and compatibility

The information in this section includes the components MobileIron supports with this product.

Support policy

MobileIron defines *supported* and *compatible* as follows:

Term	Definition
Supported product versions	The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported.
Compatible product versions	The functionality of the product and version with currently supported releases has not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases.

MobileIron Provisioner supported and compatible table

Component	Supported Version	Compatible Version
Android	5.1, 6, 7, 7.1, 8, 8.1, 9, 10, 11	Not Applicable (All listed versions are tested and supported)

Limitations

This section describes the limitations found in the current release of MobileIron Provisioner for Android. For limitations noted in previous releases, see the "Limitations" sections in the release notes for those releases, available in [MobileIron Provisioner for Android Documentation](#).

This release includes the following third-party limitation.

APA-105: Due to Google LLC design, the locale selection will not take effect when the selected provisioning mode is work profile on company-owned device.
