About MobileIron AppStation

MobileIron AppStation is a dedicated client for a MAM-only deployment. A MAM-only deployment allows you to distribute and manage apps without having to manage the device itself.

New feature summary

For new features released in previous releases, see MobileIron AppStation Product Documentation for that release.

This release includes the following new features and enhancements:

- **iOS 13 compatibility**: This release provides compatibility for iOS 13.
- **Additional client logging information for Mobile Threat Defense**: Added device logs for Mobile Threat Defense to help with troubleshooting. Users can generate encrypted logs and send them to MobileIron Support using the Settings > Enhanced Logging and Send Logs options. For more information, see "Logging and enhanced logging" in the MobileIron AppStation Guide for iOS.

Support and compatibility

The information in this section includes the components MobileIron supports with this product.

- Support policy
- MobileIron end of sale and support policy
- MobileIron components
- Device OS

NOTE: The information provided is current at the time of this release. For MobileIron product versions released after this release, see that product version's release notes for the most current support and compatibility information.

Support policy

MobileIron defines supported and compatible as follows:

TABLE 1. SUPPORTED AND COMPATIBLE DEFINITIONS

Term	Definition
Supported product versions	The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported.
Compatible product	The functionality of the product and version with currently supported releases has

TABLE 1. SUPPORTED AND COMPATIBLE DEFINITIONS (CONT.)

Term	Definition
versions	not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases.

MobileIron end of sale and support policy

For the MobileIron End of Sale and Support Policy, see MobileIron End of Sale and Support Policy.

MobileIron components

The following table provides supported and compatible information for MobileIron components.

TABLE 2. SUPPORTED MOBILEIRON COMPONENTS

MobileIron Components	Supported version	Compatible
MobileIron Cloud	R64 through the most recently released version as supported by MobileIron.	Not applicable since only the latest version is available to all customers in Cloud.
MobileIron Threat Defense	Management console: zConsole 4.24.1	Not applicable.

Device OS

The following table provides supported and compatible information for the device OS.

TABLE 3. SUPPORTED IOS VERSIONS

Device OS	Supported version	Compatible
iOS	iOS 10.0 - iOS 12.4.1	iOS 13 beta 8

Resolved issues

For resolved issues in previous releases, see MobileIron AppStation Product Documentation for that release.

This release does contains the following new resolved issues:

- IOS-14019: Fixed inconsistencies in Wi-Fi threat detection on devices running iOS 13. Previously, on iOS 13 devices, Wi-Fi threat was detected if Location was enabled (Always). However, if Location was

disabled, Wi-Fi threat was not detected. This issue is fixed.

Known issues

For known issues in previous releases, see MobileIron AppStation Product Documentation for that release.

This release does not contain new known issues.

Limitations

For limitations found in previous releases, see MobileIron AppStation Product Documentation for that release.

This release does not contains any new known new limitations.
