# About MobileIron Cloud

A modern approach to mobile security, MobileIron Cloud provides unified endpoint management (UEM) solutions in a highly scalable, secure, and easy to update infrastructure that supports millions of devices around the world.

- **Instant updates:** Get automatic software and security updates and access to new features the moment they become available.
- **On-demand scalability:** Scale your deployment as business needs change without having to worry about capacity planning.
- **Minimize hardware costs:** By eliminating the need to maintain on-prem hardware, cloud-based services require zero footprint to manage.
- **High uptime and high availability:** See our [monthly platform and infrastructure services uptime](#).
- **Maximize existing investments:** Reallocate IT resources from hardware maintenance to more strategic tasks that add value to the business.

## About these release notes

These release notes contain information about the new features and known issues particular to this patch release. For other information about the major release, please see the [release notes for that release](#).

## New features summary

This section provides summaries of new features developed for the current release of MobileIron Cloud. Product Documentation describing these features is available in the *MobileIron Cloud Administrator Guide*. For more information, see the specific sections provided for each of these features, when available.

## iOS14.5 Support

This release supports management of the following iOS 14.5 features:

- **allowAutoUnlock restriction:** Administrators can use the existing allowAutoUnlock restriction to manage this feature. Boolean. If false, disallows auto unlock. Available in macOS 10.12 and later, and iOS 14.5 and later. Default: true.
- **allowUnpairedExternalBootToRecovery restriction:** Boolean. If true, allows devices to be booted into recovery by an unpaired device. Requires a supervised device. Available in iOS 14.5 and later. Default: false.

- **forceOnDeviceOnlyDictation restriction:** Boolean. If true, disables connections to Siri servers for the purposes of dictation. Available in iOS 14.5 and later. Default: false.
- **forceWiFiToAllowedNetworksOnly restriction:** Boolean. If true, limits device to only join Wi-Fi networks set-up via configuration profile. Requires a supervised device. Available in iOS 14.5 and later. Default: false.

## Known issues

This section describes the known issues found in the current release of MobileIron Cloud.

For known issues found in previous releases, see the "Known issues" sections in the release notes for those releases, available in [MobileIron Cloud Product Documentation](#).

- **AW-55518:** Android Enterprise public apps auto-update despite the app auto-update policy being set to never in the Managed Google Play configuration.
- **AW-55488:** Cloud does not list Android Enterprise configurations as available in the default space's device groups, despite listing them as available in all other spaces.
- **AW-55468:** Cloud fails to remove a user that has a Cloud-generated Object GUID from an LDAP group when Cloud syncs with the Active Directory (AD) server after an administrator removes that user from the group in the AD server.
- **AW-55296:** When the browser language is Japanese or Chinese, Cloud creates an "教育" - Educational app category when an administrator adds any app category.
