# About MobileIron Cloud

A modern approach to mobile security, MobileIron Cloud provides unified endpoint management (UEM) solutions in a highly scalable, secure, and easy to update infrastructure that supports millions of devices around the world.

- Instant updates: Get automatic software and security updates and access to new features the moment they become available.
- On-demand scalability: Scale your deployment as business needs change without having to worry about capacity planning.
- Minimize hardware costs: By eliminating the need to maintain on-prem hardware, cloud-based services require zero footprint to manage.
- High uptime and high availability: See our [monthly platform and infrastructure services uptime](#).
- Maximize existing investments: Reallocate IT resources from hardware maintenance to more strategic tasks that add value to the business.

## About these release notes

These release notes contain new feature, resolved and known issues, limitations, and upgrade information particular to this patch release. For other information about the major release, please see the [release notes for that release](#).

## Resolved issues

This section describes the resolved issues fixed in this patch release of MobileIron Cloud.

For resolved issues provided in previous releases, see the "Resolved issues" sections in the release notes for those releases, available in [MobileIron Cloud Product Documentation](#).

**AW-54308:** MobileIron Cloud no longer randomly distributes configurations to devices regardless of static device distribution group membership.
