About MobileIron Core

MobileIron Core is a mobile management software engine that enables IT to set policies for mobile devices, applications, and content. This product enables Mobile Device Management, Mobile Application Management, and Mobile Content Management capabilities.

About these release notes

This release contains security updates for MobileIron Core. It addresses vulnerabilities that might be remotely exploitable without authentication (that is, they might be exploited over a network without requiring user credentials). MobileIron strongly recommends that customers apply this and any security updates as soon as possible. For more information, see the related [Security Bulletin](#).

For new feature and other information about the major release, please see the [release notes for that release](#).

Resolved issues

For resolved issues provided in previous releases, see the "Resolved issues" sections in the release notes for those releases, available in [MobileIron Core Product Documentation](#).

This release includes the following resolved issues.

- **VSP-62202:** Reboots when enabling or disabling the Core service from the Core System Manager portal were failing, due to MySQL service issues. This issue has been fixed.
- **VSP-62045:** Subsequent automatic OS updates for an iOS device were failing after the first successful automatic OS update. The new OS update was being downloaded to the device, but the OS update did not automatically install. This issue has been fixed.
- **VSP-62017:** Updates to the Google Store Layout for Android Enterprise devices were failing after February 2020. This issue has been fixed.
- **VSP-61925:** Custom Secure Socket Layer (SSL) VPN configurations were not being pushed to iOS devices properly after upgrading to Core 10.6.0.0. This issue has been fixed.

MobileIron Core upgrade information

This section describes the following upgrade information for the current release of MobileIron Core.

- [MobileIron Core upgrade paths](#)
- [MobileIron Core upgrade URL](#)

NOTE: MobileIron Core and Enterprise Connector should be running the same version and the same build.

MobileIron Core upgrade paths

MobileIron recommends the following upgrade paths, which are fully tested and supported.

IMPORTANT: MobileIron recommends that you upgrade both Core and Connector to this release for full security protection.

Supported upgrade paths to Core 10.6.0.1

- 10.4.0.0 → 10.6.0.1
- 10.4.0.1 → 10.6.0.1
- 10.4.0.2 → 10.6.0.1
- 10.4.0.3 → 10.6.0.1
- 10.5.0.0 → 10.6.0.1
- 10.5.1.0 → 10.6.0.1
- 10.5.1.1 → 10.6.0.1
- 10.5.2.0 → 10.6.0.1
- 10.5.2.1 → 10.6.0.1
- 10.6.0.0 → 10.6.0.1

MobileIron Core upgrade URL

To upgrade MobileIron Core:

Use the following URL if you specify an alternate URL:

<https://support.mobileiron.com/mi/vsp/10.6.0.1-19/mobileiron-10.6.0.1-19>

Enterprise Connector upgrade information

This section describes the following upgrade information for the current release of Enterprise Connector.

- [Enterprise Connector upgrade information](#)
- [Enterprise Connector upgrade URL](#)

MobileIron Enterprise Connector upgrade paths

Direct upgrade from only the following Enterprise Connector versions to version 10.6.0.1 is supported:

IMPORTANT: MobileIron recommends that you upgrade both Core and Connector to this release for full security protection.

- 10.4.0.0 → 10.6.0.1
- 10.4.0.1 → 10.6.0.1
- 10.4.0.2 → 10.6.0.1
- 10.4.0.3 → 10.6.0.1
- 10.5.0.0 → 10.6.0.1
- 10.5.1.0 → 10.6.0.1
- 10.5.1.1 → 10.6.0.1
- 10.5.2.0 → 10.6.0.1
- 10.5.2.1 → 10.6.0.1
- 10.6.0.0 → 10.6.0.1

If you are upgrading from a version not listed here, then you need to complete one or more previous upgrades first. See the upgrade guide for that version.

Enterprise Connector upgrade URL

Use the following URL if you specify an alternate URL:

Upgrades from supported Connector releases:
