About MobileIron Core

MobileIron Core is a mobile management software engine that enables IT to set policies for mobile devices, applications, and content. This product enables Mobile Device Management, Mobile Application Management, and Mobile Content Management capabilities.

About these release notes

These release notes contain only issues and upgrade information which are particular to this patch release. For the complete release notes, including new feature and support and compatibility information, see the release notes for the major release.

New features and enhancements

The following new features and enhancements are available with this release:

- **Disable Wi-Fi MAC address randomization field added:** In iOS 14.0, the default behavior for a device reporting its Wi-Fi MAC address has changed to report a random address for new connections instead of the device's actual Wi-Fi MAC address. The device user can manually turn this on/off through their device's settings. In Core, a new option has been added to the Wi-Fi configuration to turn off this randomization.

Upon upgrade, this option will be disabled. Administrators can turn off the randomization of the Wi-Fi MAC address by editing the Wi-Fi configuration and selecting the check the box labeled "Disable MAC address randomization." This will cause the Wi-Fi configuration to be re-pushed to all devices. Device users will see a "Privacy Warning" message on their Wi-Fi settings indicating that the network has reduced privacy protections. Changing this option in Core will disable the Private Address, but the device user will still have the ability to set the device to report a random address for new connections instead of the device's actual Wi-Fi MAC address.

Resolved issues

There are no resolved issues in this release. For resolved issues found in previous releases, see the "Resolved issues" sections in the release notes for those releases, available in [MobileIron Core Product Documentation](#).

- **VSP-63083:** When being edited, Android enterprise managed app configurations could show an incorrect value for a configuration key. This resulted from a difference between the order of the configurations in the UI and the database. This issue has been fixed.

Known issues

There are no known issues in this release. For known issues found in previous releases, see the "Known issues" sections in the release notes for those releases, available in [MobileIron Core Product Documentation](#).

Limitations

There are no limitations in this release. For limitations found in previous releases, see the "Limitations" sections in the release notes for those releases, available in [MobileIron Core Product Documentation](#).

MobileIron Core upgrade information

This section describes the following upgrade information for this release of MobileIron Core.

- [MobileIron Core upgrade paths](#)
- [MobileIron Core upgrade URL](#)

The [release notes for the major release](#) offer supplementary upgrade information, such as calculating disk space and performing backups.

MobileIron Core upgrade paths

MobileIron recommends the following upgrade paths. The listed upgrade paths are fully tested and supported.

NOTE: MobileIron Core and Enterprise Connector should be running the same version and the same build.

Supported upgrade paths to Core 10.7.0.1

- 10.5.0.0 → 10.7.0.1
- 10.5.1.0 → 10.7.0.1
- 10.5.1.1 → 10.7.0.1
- 10.5.2.0 → 10.7.0.1

- 10.5.2.1 → 10.7.0.1
- 10.6.0.0 → 10.7.0.1
- 10.6.0.1 → 10.7.0.1
- 10.7.0.0 → 10.7.0.1

MobileIron Core upgrade URL

To upgrade MobileIron Core:

Use the following URL if you specify an alternate URL:

<https://support.mobileiron.com/mi/vsp/10.7.0.1-9/mobileiron-10.7.0.1-9>

Enterprise Connector upgrade information

This section describes the following upgrade information for the current release of Enterprise Connector.

- [MobileIron Enterprise Connector upgrade paths](#)
- [Enterprise Connector upgrade URL](#)

MobileIron Enterprise Connector upgrade paths

NOTE: MobileIron Core and Enterprise Connector should be running the same version and the same build.

Direct upgrade from only the following Enterprise Connector versions to version 10.7.0.1 is supported:

- 10.5.0.0 → 10.7.0.1
- 10.5.1.0 → 10.7.0.1
- 10.5.1.1 → 10.7.0.1
- 10.5.2.0 → 10.7.0.1
- 10.5.2.1 → 10.7.0.1
- 10.6.0.0 → 10.7.0.1
- 10.6.0.1 → 10.7.0.1
- 10.7.0.0 → 10.7.0.1

If you are upgrading from a version not listed here, then you need to complete one or more previous upgrades first. See the upgrade guide for that version.

Enterprise Connector upgrade URL

Use the following URL if you specify an alternate URL:
