# About Docs@Work

The Docs@Work app gives device users a secure and intuitive way to access, store, view, edit, and annotate documents from content repositories, such as Microsoft SharePoint. It allows administrators to configure content repositories, which are then automatically available to device users. It also lets administrators establish data loss prevention controls to protect documents from unauthorized distribution.

## About these release notes

These release notes contain resolved and known issues, limitations, and upgrade information particular to this patch release. For new feature and other information about the major release, please see the [release notes for that release](#).

## Resolved issues

This section describes the following resolved issues fixed in the current release of Docs@Work. For resolved issues found in previous releases, see the "Resolved issues" sections in the release notes for those releases, available in [MobileIron Docs@Work for iOS Product Documentation](#).

- **DWIC-7368:** Previously when the Docs@Work app was launched, the app would switch to Mobile@Work for authentication and sometimes the app might stop responding on the Mobile@Work side. Also, relaunching the app again would switch back to Mobile@Work with the **Secure apps are not available** message or the app would switch back to itself with the **Failed to authenticate user** message. These issues have been fixed.

## Known issues

For known issues provided in previous releases, see [MobileIron Docs@Work Product Documentation](#) for that release.

This release includes the following known issue.

- **DWIC-7379:** The Docs@Work app might stop responding unexpectedly when another device airdrops a file, while the user is on Touch ID screen for App's authentication.

## Documentation resources

MobileIron product documentation is available at <https://help.mobileiron.com/s/mil-productdocumentation>. If you have a MobileIron Cloud deployment, the MobileIron Cloud Administrator Guide is also available from your instance of MobileIron Cloud through the Help link in the user interface.

MobileIron Support credentials are required to access documentation in the Support Community.
