About MobileIron FilePass

FilePass enables users to share documents securely between MobileIron apps (Docs@Work and Email+) and Microsoft Intune MAM-protected Office 365 apps, while retaining identity coherency. The FilePass app honors Intune App Protection policies just like any app with Intune MAM.

New feature summary

For the summary of new features introduced in previous releases, see [MobileIron FilePass for iOS Product Documentation](#) for that release.

This release introduces the following new features and enhancements:

- [FilePass app new features and enhancements](#)
- [FilePass administrator features and enhancements](#)

FilePass app new features and enhancements

This release introduces the following new feature and enhancement.

- **iOS 14 compatibility:** FilePass 1.4.0 is compatible with iOS 14.

FilePass administrator features and enhancements

This release introduces no new administrator features and enhancements.

Support and compatibility

The section includes the supported and compatible components that MobileIron supports with this product.

NOTE: This information is current at the time of this release. For MobileIron product versions released after this release, see that product version's release notes for the most current support and compatibility information.

Support policy

MobileIron defines supported and compatible as follows:

- **Supported product versions:** The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported.
- **Compatible product versions:** The functionality of the product and version with currently supported releases has not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases.

For MobileIron's End of Sale and Support Policy, see <https://community.mobileiron.com/docs/DOC-1089>.

FilePass bundle ID
