About Mobile@Work for iOS

Mobile@Work for iOS is the MobileIron client app that works with MobileIron Core. Device users download Mobile@Work, which automatically configures the device to function in an enterprise environment by enforcing the configuration and security policies that the administrator set in MobileIron Core.

About these release notes

These release notes only contain resolved and known issues, limitations, and upgrade information particular to this patch release. For new feature and other information about the major release, please see the release notes for that release.

MobileIron Mobile@Work upgrade information

This section describes the following upgrade information for the current release of Mobile@Work.

To fix an AppConnect startup issue in Wrapped apps, before upgrading to Mobile@Work version 12.3.0 through the latest version of MobileIron, wrap all AppConnect wrapper apps using AppConnect 4.5.2 for iOS.

NOTE: AppConnect apps built with SDKs older than version 4.5.2 will no longer work.

For more information, see AppConnect for iOS: Mandatory Updates for Client App Compatibility in the MobileIron Support Community.

Resolved issues

This section describes the following resolved issues fixed in the current release of Mobile@Work for iOS. For resolved issues of previous releases, see the "Resolved issues" section in the release notes for those releases, available in Mobile@Work for iOS Product Documentation Home Page.

There are resolved issues in this release.

- **IOS-16300:** When the AppConnect Passcode in the AppConnect Global Policy was disabled, "Registration required" displayed after the AppConnect app was launched. This issue has been fixed.
