About Mobile@Work for iOS

Mobile@Work for iOS is the MobileIron client app that works with MobileIron Core. Device users download Mobile@Work, which automatically configures the device to function in an enterprise environment by enforcing the configuration and security policies that you set on MobileIron Core.

About these release notes

These release notes only contain resolved and known issues, limitations, and upgrade information particular to this patch release. For new feature and other information about the major release, please see the [release notes for that release](#).

Resolved issues

This section describes the following resolved issues fixed in the current release of Mobile@Work for iOS. For resolved issues of previous releases, see the "Resolved issues" section in the release notes for those releases, available in [Mobile@Work for iOS Product Documentation Home Page](#).

There are resolved issues in this release:

- **IOS-15847:** When Mobile@Work was upgraded on an iOS 14 beta device, the device was detected as "Compromised." This issue has been fixed.
- **IOS-15846:** Mobile@Work did not register on an iOS 14 beta device. This issue has been fixed.
