## About Web@Work

MobileIron Web@Work is a secure browser that allows enterprise users to securely access web content in their corporate intranet. Web@Work uses the Chromium open-source project as its base engine, and product information, including version details, can be accessed by opening the following link in the Web@Work browser: <https://www.whoishostingthis.com/tools/user-agent/>

## Resolved issues

For resolved issues identified in previous releases, see the [MobileIron Web@Work Product Documentation](#) for that release.

This release includes the following resolved issues.

- **ASB-2590:** Previously, the Web@Work app was unable to open a URL prefixed with mibrowser or mibrowsers (for example: mibrowsers://www.espn.com) when accessed from Email+. This issue has been fixed.

## Documentation resources

MobileIron product documentation is available at <https://help.mobileiron.com/s/mil-productdocumentation>.

If you have a MobileIron Cloud deployment, the *MobileIron Cloud Administrator Guide* is also available from your instance of MobileIron Cloud through the **Help** link in the user interface.

MobileIron Support credentials are required to access documentation in the Support Community.
