Introduction

This document describes the client environments and IT infrastructure that are compatible with this release.

In this document, we identify compatibility testing for this release with the following terminology:

- Qualified (Q)—Indicates that the item was systematically tested by QA for this release.
- Compatible (C)—Indicates that the item was not tested for this release, but based on testing done for previous releases, we support it.

Ivanti supports all items listed as qualified or compatible.

The IPS Gateway versions listed below are the supported versions to use with Gateway for respective releases.
