Introduction

This is an incremental release notes describing the changes made from 9.1R11 release to 9.1R11.1. The 9.1R11 GA release notes still apply except for the changes mentioned in this document. Please refer to 9.1R11 GA release notes for the complete version.

Noteworthy Information in 9.1R11 Release

- This release provides additional security hardening for Release 9.1R11.
- This release provides ability to include additional internal file information in system snapshot. To access this option, navigate to **Maintenance->Troubleshooting->System Snapshot** page on the Admin UI.
- This release provides ability to strictly validate user names in login screens. Validation curtails the Username to less than 128 characters and prevents using special characters. An event log entry is generated whenever login fails due to Username validation. This feature is enabled by default and can be enabled/disabled modifying Username Validation option under **System > Configuration > Security > Miscellaneous** on the Admin UI.

Fixed Issues

Problem Report Number	Summary
PSB-88	Implement Stricter Username Validation.
PSB-75	Include Enhanced Directory Listing in Snapshot.

Known Issues

Problem Report Number	Release Note
-----------------------	--------------

No new known issues for this release. Refer to 9.1R11 GA release notes for complete list of Known Issues.
