# Overview

This document lists the files that are installed on a client machine as part of a Pulse Secure client installation, and the registry changes that are made on a Windows endpoint.

## Pulse Secure Client Files for Windows 7, Windows 8 and Windows 10

**Note:** The Pulse Secure for Windows installer creates/uses the "C:\windows\winsxs\InstallTemp" directory. If an access-control list prevents the installer from creating/accessing a directory with this name, then the Pulse installation will fail.

The following file list is from Pulse Secure 5.2 R1 on Windows 8.1, 64-bit. On 32-bit installations, the files listed here in Program Files (x86) would be in the same location but without '(x86)' in the path.

The files of the above directory are as follows:

.pulse\_Connections.txt

.pulse\_status

pulsesvc.log

# Pulse Secure Setup Client Files for Windows

When a Windows user signs in to the Pulse Secure Access Service Appliance, the device attempts to install an ActiveX control (Pulse Secure Setup) on the user's system. If the device successfully installs Pulse Secure Setup, then Pulse Secure Setup manages the installation of Windows-based client applications.

## Pulse Secure Setup Client Files for Windows – Installer Package

PulseSetupClient.cab

## Pulse Secure Setup Client Files for Windows – Additional Package

The Pulse Secure Setup Client installs the following additional files in C:\Windows\Downloaded Program Files:

```
install.log
PulseExt.exe
PulseExt64.exe
PulseSetupClient.inf
PulseSetupClient.ocx
PulseSetupClient64.inf
PulseSetupClient64.ocx
PulseSetupClientCtrlUninstaller.exe
PulseSetupClientCtrlUninstaller64.exe
string_de.properties
string_en.properties
string_es.properties
string_fr.properties
string_ja.properties
string_ko.properties
string_zh.properties
string_zh_cn.properties
```

In addition, the following folder is created.

- C:\Documents and Settings\username\Application Data\Pulse Secure

If the administrator configures a list of Secure Access Services that the client can trust, this list of Secure Access Services is stored in the following files:

- %ProgramFiles%\Pulse Secure\Whitelist.txt (Windows)
- /usr/local/pulse/whitelist.txt (Macintosh and Linux)

In addition, users can themselves make the decision to trust a Pulse server. When the user makes a decision to trust a Pulse server, the service is added to the user whitelist. User whitelist files are located in:

- %AppData%\Pulse Secure\Whitelist.txt (Windows)
- /~/Library/Application Support/Pulse Secure/whitelist.txt (Macintosh)
