Document Revision	Description
1.0	Initial Document for Release 9.2.0

Contents

Overview

This document is the release notes for Pulse Secure Mobile Android Release 9.2.0. This document contains information about what is included in this software release: supported features, feature changes, unsupported features, known issues, and resolved issues. If the information in the release notes differs from the information found in the documentation set, follow the release notes.

VPN New Features

The following table describes the major features that are introduced in the corresponding release.

Features	Description
Release 9.2.0	
SAML Single Logout	SAML Single Logout (SLO) feature allows users to log out completely from user device when logged out from mobile clients. This protocol allows users to login from Service Provider(SP) as well as Identity Provider(IdP). Thus, users need to provide credentials again upon next authentication.
	Note: SAML SLO is not supported for kill user, User deletion and session timed out.
