# Overview

---

This document is the release notes for Pulse Secure Mobile Android Release 9.5.0. This document contains information about what is included in this software release: supported features, feature changes, unsupported features, known issues, and resolved issues. If the information in the release notes differs from the information found in the documentation set, follow the release notes.

# VPN New Features

---

The following table describes the major features that are introduced in the corresponding release.

Features	Description
<b>Release 9.5.0</b>	
No VPN New Features in this release.	

---

# VPN Fixed Issues

---

The following table lists issues that have been fixed and are resolved by upgrading to this release.

Problem Report Number	Summary
<b>Release 9.5.0</b>	
PRS-396742	When Pulse Application is running in background and after idle timeout, if a white-listed application is launched, VPN On-Demand is not triggered and traffic is not tunneled.
PAND-3906	Server certificate untrusted error is returned when device certificate is renewed/changed in PCS and the profile is connected without closing the client.

# VPN Known Issues

---

The following table lists the Known issues in the current release.

Problem Report Number	Release Note
<b>Release 9.5.0</b>	
PAND-3926	<b>Symptom:</b> Browser initiated session fails to connect to the respective URL when there is an existing session. <b>Condition:</b> Connect to the existing VPN profile from the Browser using URL. <b>Workaround:</b> Close and open the Pulse client and then connect the profile. Disconnect the VPN either on Pulse Client or on browser before connecting to the secondary URL.
PAND-3874	<b>Symptom:</b> Rekeying is not working for 6in6 connection when data transfer is going on. <b>Condition:</b> Connect to PCS Server using IPv6 URL and do data transfer. <b>Workaround:</b> None.
