# Preface

•	Document Conventions	1
•	Requesting Technical Support	2
•	Reporting Documentation Issues	3

## **Document Conventions**

The document conventions describe text formatting conventions, command syntax conventions, and important notice formats used in Pulse Secure technical documentation.

### **Text Formatting Conventions**

Text formatting conventions such as boldface, italic, or Courier font may be used in the flow of the text to highlight specific words or phrases.

Format	Description	
bold text	Identifies command names	
	Identifies keywords and operands	
	Identifies the names of user-manipulated GUI elements	
	Identifies text to enter at the GUI	
italic text	Identifies emphasis	
	Identifies variables	
	Identifies document titles	
Courier Font	Identifies command output	
	Identifies command syntax examples	

## **Command Syntax Conventions**

Bold and italic text identify command syntax components. Delimiters and operators define groupings of parameters and their logical relationships.

Convention	Description	
bold text	Identifies command names, keywords, and command options.	
italic text	Identifies a variable.	
[]	Syntax components displayed within square brackets are optional.	
	Default responses to system prompts are enclosed in square brackets.	

Convention	Description	
{ <b>x</b>   <b>y</b>   <b>z</b> }	A choice of required parameters is enclosed in curly brackets separated by vertical bars. You must select one of the options.	
x   y	A vertical bar separates mutually exclusive elements.	
<>	Non-printing characters, for example, passwords, are enclosed in angle brackets.	
	Repeat the previous element, for example, member[member].	
1	Indicates a "soft" line break in command examples. If a backslash separates two lines of a command input, enter the entire command at the prompt without the backslash.	
bold text	Identifies command names, keywords, and command options.	

## **Notes and Warnings**

Note, Attention, and Caution statements might be used in this document.

**Note:** A Note provides a tip, guidance, or advice, emphasizes important information, or provides a reference to related information.

#### ATTENTION

An Attention statement indicates a stronger note, for example, to alert you when traffic might be interrupted or the device might reboot.

#### CAUTION

A Caution statement alerts you to situations that can be potentially hazardous to you or cause damage to hardware, firmware, software, or data.

# **Requesting Technical Support**

Technical product support is available through the Pulse Secure Global Support Center (PSGSC). If you have a support contract, file a ticket with PSGSC.

• Product warranties—For product warranty information, visit https://support.pulsesecure.net/product-service-policies/

## Self-Help Online Tools and Resources

For quick and easy problem resolution, Pulse Secure provides an online self-service portal called the Customer Support Center (CSC) that provides you with the following features:

- Find CSC offerings: https://support.pulsesecure.net
- Search for known bugs: https://support.pulsesecure.net
- Find product documentation: https://www.pulsesecure.net/techpubs
- Download the latest versions of software and review release notes: https://support.pulsesecure.net

- Open a case online in the CSC Case Management tool: https://support.pulsesecure.net
- To verify service entitlement by product serial number, use our Serial Number Entitlement (SNE) Tool: https://support.pulsesecure.net

For important product notices, technical articles, and to ask advice:

- Search the Pulse Secure Knowledge Center for technical bulletins and security advisories: https://kb.pulsesecure.net
- Ask questions and find solutions at the Pulse Community online forum: https://community.pulsesecure.net

## Opening a Case with PSGSC

You can open a case with PSGSC on the Web or by telephone.

- Use the Case Management tool in the PSGSC at https://support.pulsesecure.net.
- Call 1-844 751 7629 (Toll Free, US).

For international or direct-dial options in countries without toll-free numbers, see https://support.pulsesecure.net/support/support-contacts/

# **Reporting Documentation Issues**

To report any errors or inaccuracies in Pulse Secure technical documentation, or to make suggestions for future improvement, please send your comments to: techpubs-comments@pulsesecure.net. Include a full description of your issue or suggestion and the document(s) to which it relates.

# Getting Started With Pulse One

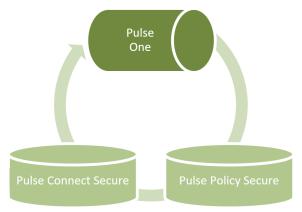

•	Overview of Pulse One	5
•	Logging Into Pulse One	6
•	Changing the User Password	8
•	Adding Pulse One Licenses	9
•	Setting a Session Timeout Threshold	10

# **Overview of Pulse One**

Pulse One provides unified management of Pulse Connect Secure and Pulse Policy Secure in a single easy-touse console.

Pulse One, a single, comprehensive management console, offers the superior administrative end-to-end control and visibility needed to manage remote, local and mobile access to any corporate applications. Administrators use its intuitive, role-based console to monitor system health, manage security policies, troubleshoot issues, report on the appliance and device health, and publish appliance and mobile device configuration.

#### FIGURE 1 Pulse One Unified Management

It controls enterprise access to data center and cloud from a single console.

- Role-based access Grants console access and privileges based on IT role and credentials.
- **Group-based management** Publish software updates, policy changes and configuration provisioning by custom-defined groups. ESAP updates to appliances are also supported.
- **Centralized administration** Collectively administers multiple appliances without logging into them on a box-by-box basis.
- **Built-in Mobility Management** Provides basic EMM functionality for iOS and Android devices and management of BYOD and corporate-owned workspaces.

- System Dashboard Assesses the collective health of all appliances and provides security alerts and appliance alarms.
- Appliance Dashboard Provides appliance status with analytics for connectivity, capacity, utilization, and uptime.
- Administrator Audit Logging Tracks administrator changes to appliance configuration.
- Monitor and Reporting Monitors system activity and provides historical reporting.
- **Deployment** Introduces new features and scales without data center logistics and planning.

## Logging Into Pulse One

This section details the steps to log in to Pulse One as an administrator.

Use the Pulse One admin URL to launch the Pulse One Admin Console.

- If you are an existing user, enter the user name and password. Click **Sign In** to log in to Pulse One.
- If Enterprise SSO is configured for your user ID, then click Sign In with Enterprise SSO. For details nection Properties" on page 62.

ab	pout the Enterprise SSO con	ifiguration, see <b>"Enterp</b>	rise Conr

	Pulse Secure Access for the Welcome to		
	ې Username		
	Password		
	Sign		
	Forgot password?	Sign In with Enterprise SSO	

FIG

If you are a new user, you will have received a welcome mail from Pulse One to your registered mail ID. Click the **Set your password** link in the welcome mail. In the Pulse One login page that appears, provide a strong password and confirm the password. On successful login, the End User License Agreement (EULA) page appears.

If you have forgotten your Pulse One password, click the **Forgot password?** link. In the page that appears, enter your user id and click **Request reset**.

An email that contains a **Reset your password** link will be sent to your registered mail id. Use this link to launch Pulse One and provide your new password and confirm the new password.

**Note:** The **Reset your password** link has an expiration time of 1 hour. Beyond this time, you should make a new request for reset.

If you are a new user logging into Pulse One for the first time, then in the EULA page use the scroll bar to read through the terms of the agreement and then click **Agree**.

The Welcome wizard appears. This provides you a brief overview of Pulse One, appliance management and Bring Your Own Devices (BYODs).

			×

Don't show this to me again			START NOW

FIGURE 3 Pulse One Welcome Wizard

In the Welcome wizard, click the right-arrow button until the **Get Started** option appears. If required, select the **Don't show this to me again** check box and then click **Start Now**.

**Note:** You can view the Welcome wizard any time by clicking the **Settings** icon on the top right corner of the page and selecting **Show Welcome Wizard**.

#### The Pulse One **Home** page appears:

#### FIGURE 4 Pulse One Home Page ዾ ٩ Secure<sup>.</sup> DASHBOARD APPLIANCES ANALYTICS ADMINISTRATION SETTINGS ADMIN PULSE ONE Dashboard OVERALL **USER ACTIVITIES** Overall Dashboard Download Report Send Report 2 OVERALL APPLIANCE STATS $\odot \stackrel{*}{=}$ 0 0 0 0 2 0 of 37000 of 0 Policy Secure Policy Secure Named User Connect Secure Connect Secure Appliance concurrent user licenses licenses use appli арр concurrent user licenses used used APPLIANCE HEALTH 0 ‡ Pulse-PPS-1 MODEL: VA-SPE VERSION: 9.0R1-49496 UPTIME: 0 DAYS 11 HRS 5 MINS 18 SECS < >2% 0% 25% Auth Failures (24H) kb/s Throughput Concurrent Users ActiveSync Connections

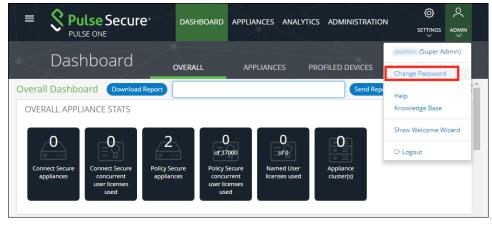

Select the appropriate tab, settings icon or user icon, and get started with the administration.

# Changing the User Password

To change the user password:

- 1. Click the **User** icon on the top-right corner of the page.
- 2. From the menu, click **Change Password** to change your login password.

An email that contains **Set new password** link will be sent to your registered mail id. Use this link to launch Pulse One and provide your new password.

**Note:** The **Set new password** link that you received in the email has an expiration time of 1 hour.

3. To log out of the admin console, click **Logout**.

## Adding Pulse One Licenses

To view and install licenses on Pulse One Cloud:

- 1. Login into Pulse One as an administrator.
- 2. Click the **Settings** icon on top-right-corner of the page.
- 3. Select Licenses. The Licenses page appears.

#### FIGURE 6 Installed Licenses

😑 🙎 Pulse Se	CUTE DASHBOARD APPLIANCES WORKSPACES ANALYTICS	ADMINISTRATION		Д admin
PULSE ONE				
Pulse One Properties	Licenses + Add New License	Pulse One Properties	5

VPN Cert				

Note: Any expired licenses (none shown in this example) are displayed in red.

#### 4. Click Add New License.

The **Activate License** dialog appears.

5. Enter the license key.

#### 6. Click Activate.

The new license is confirmed.

The new license appears in the list of licenses. For example:

FIGURE 8 New Pulse Workspace License

## Setting a Session Timeout Threshold

You can set a session timeout threshold. After a period of activity reaches this threshold, the user is logged out, and must log in again to continue.

To set a session timeout threshold:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Settings** icon on top-right-corner of the page.
- 3. Select Pulse One Properties.

The **Pulse One Properties** page appears.

#### FIGURE 9 Pulse One Properties

	ecure dashboard appliances and workspaces analytics administration	$\rightarrow$		Q admin

Apple CA Certificate	Name Value	Apple CA Certificate Android Enterprise Enterprise Usage Agre	ement	٢
Android Enterprise	Password (9)	VPN Cert		
Enterprise Usage Agreement	Misc (4)			
VPN Cert	E Session (1)			

4. Expand the Session category.

5. Edit the Session idle timeout (minutes) property and specify a new setting.

**Note:** The default setting is *20*.

6. Save the new setting.

The new session timeout threshold is applied to your current session and all subsequent sessions.

٩

# Working with the Pulse One Dashboard

•	Viewing Overall System Health	13
•	Customizing Dashboards and Widgets	14
•	Exporting Dashboard Information	21

# Viewing Overall System Health

To view metrics for system health, select the **Dashboard** tab, and then select the **Overall** tab. For example:

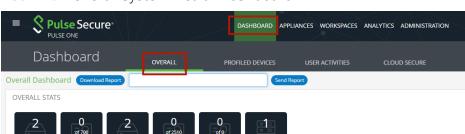

FIGURE 10 Overall System Health Dashboard

Dashboard	OVERALL	PROFILED DEVICES	USER ACTIVITIES	CLOUD SECURE			
Overall Dashboard Download R	eport	Ser	nd Report				Z
OVERALL STATS							€
Connect Secure applances	2 Policy Secure appliances Delicy Secure concurrent user licenses used	O Named User licenses used Appliance cluster(s)					
APPLIANCE HEALTH							⊖ ‡
cliff_204	MODEL: PS/	\5000-V	VERSION: 9.1R	4.1-4968	UPTIME: 25 DAYS 22	HRS <b>3</b> MINS <b>49</b> SECS	
5% CPU Utilization	0% Memory Utilization	29% Disk Utilization	0.31 kb/s Throughput	O Concurrent Users	O ActiveSync Connections	<b>O</b> Auth Failures (24H)	>
CRITICAL EVENTS	0 *	RESOURCE DIAL		⊖ <b>*</b>	LOGINS IN PAST 24 HOURS	5	⊖ *

This dashboard includes the following widgets by default:

- Overall appliance statistics. •
- Appliance health for individual appliances.
- User login activity.
- VPN realm usage.
- Role usage.
- Frequent user logins. •
- Logins in the past 24 hours.
- Critical appliance events.
- Resource dial.

- Pulse Connect Secure versions.
- Pulse Policy Secure versions.
- Appliance concurrent users.

Each widget that can be refreshed by clicking **Reload Widget Content** ( $^{\bigcirc}$ ) and collapsed by clicking **Collapse/ Expand Widget** ( $^{\ddagger}$ ).

Click **Download Report** to create and download a multi-page PDF report that includes each widget that currently displays a populated graph. To send the graph via email, enter an email address and click **Send Report**. See **"Exporting Dashboard Information" on page 21**.

# **Customizing Dashboards and Widgets**

The dashboard views are customizable. You can change the dashboard layout, add/remove widgets, and rearrange the widgets.

To customize the widgets on a **Dashboard** tab:

FIGURE 11 Customizing the Dashboard

1. Display the required dashboard tab. For example, the **Overall** tab.

<u>@</u> Q **Secure** DASHBOARD APPLIANCES ANALYTICS ADMINISTRATION SETTINGS PULSE ONE ADMIN Dashboard OVERALL Overall Dashboard Download Repo Send Repor OVERALL APPLIANCE STATS  $\odot \div$ 0 0 5 0 n of 1108 of 0 of 3200 med Use APPLIANCE HEALTH  $\odot \div$ 

**Note:** The inclusion of individual menus and tabs will reflect all loaded licenses. Your view may differ from that shown above.

2. Click the **Enable Edit mode** icon ( $\square$ ) on the top-right of the tab.

A widget layout summary for the dashboard appears. For example, for the **Overall** tab:

FIGURE 12	Dashboard	Widget Layout
-----------	-----------	---------------

Pulse Secure PULSE ONE		DASHBOARD APPLIANCES AN	ALYTICS ADMINI	STRATION	SETTINGS ADMIN
Dashboard	OVER	ALL PROFILED DEVICES	USER A	CTIVITIES CLOUD SECU	JRE

OVERALL APPLIANCE STATS					@×
◇ APPLIANCE HEALTH					© ×
♦ LOGINS IN PAST 24 HOURS	@ ×	CRITICAL EVENTS	@ ×	♦ RESOURCE DIAL	© ×
◇ CONNECT SECURE VERSIONS	@ ×	POLICY SECURE VERSIONS	@ ×		

- 3. (Optional) Click **Add New Widget** (⊕) to add a widget to the current layout, see **"Adding a New Widget" on page 16**.
- 4. (Optional) Click **Edit Dashboard** (<sup>(())</sup>) to select a new layout, see **"Editing the Dashboard Layout" on** page 17.
- 5. (Optional) Rearrange the current widgets by dragging a widget using its **Change Widget Location** ( handle.
- 6. (Optional) Change the settings for a widget by clicking its **Edit Widget Configuration** (<sup>@</sup>), see **"Editing Widget Configuration" on page 19**.
- 7. (Optional) Remove a widget by clicking its **Remove Widget** control.
- 8. (Optional) Click **Undo Changes** ( $\Omega$ ) to reset all unsaved changes and close the layout summary.
- 9. Click **Save Changes** ( $\checkmark$ ) to save all changes and close the layout summary.

## Adding a New Widget

To add a new widget to a dashboard tab:

- 1. Display the required dashboard tab. For example, the **Overall** tab.
- 2. Click the **Enable Edit mode** icon ( $\square$ ) on the top-right of the tab.

A widget layout summary for the dashboard appears.

3. Click the **Add New Widget** (⊕) control.

A list of widgets appears. For example:

Add new widget	×
Critical Events Compliant End Points Appliance Firmware Versio Appliance Health Resource Dial	Display critical appliance activities Display a work in progress message Display appliance firmware versions count Display the appliance health Display the Resource Utilization above alarm thresholds, based on
Overall Stats Device Owner Workspace Allocation Workspace App Visibility Workspace Connectivity	metric selection. Display appliance stats for Pulse One Display current device owner Display current workspace allocations Display Workspace App Visibility Chart Display recent connectivity of workspaces
Coverage by Policy Workspace Stats Total Workspaces Devices and Carriers	Display current policy coverage of workspaces Display the current stats for mobile workspaces Display the total mobile workspaces Display devices & carriers breakdown
	Close

4. Select the required widget.

The selected new widget is added to the top of the layout summary.

- 5. (Optional) On the widget layout, change the settings for the widget by clicking its **Edit Widget Configuration** (<sup>(©)</sup>) control, see **"Editing Widget Configuration" on page 19**.
- 6. (Optional) Click **Undo Changes** ( $\Omega$ ) to reset all unsaved changes and close the layout summary.
- 7. Click **Save Changes** ( $\checkmark$ ) to save all changes and close the layout summary.

## Editing the Dashboard Layout

To change the layout of a dashboard tab:

- 1. Display the required dashboard tab. For example, the **Overall** tab.
- 2. Click the **Enable Edit mode** icon ( $\square$ ) on the top-right of the tab.

A widget layout summary for the dashboard appears. For example, for the **Overall** tab:

#### FIGURE 14 Dashboard Widget Layout

Pulse Secure PULSE ONE	DASHBOARD APPLIANCES ANALYTICS AD	MINISTRATION SETTINGS ADMIN
Dashboard	ALL PROFILED DEVICES US	ER ACTIVITIES CLOUD SECURE

- 5. (Optional) Click **Undo Changes**  $(\Omega)$  to reset all unsaved changes and close the layout summary.
- 6. Click **Save Changes** ( $\checkmark$ ) to save all changes and close the layout summary.

The dashboard layout updates to reflect the selected layout.

## **Editing Widget Configuration**

To change the configuration of a widget:

- 1. Display the required dashboard tab. For example, the **Overall** tab.
- 2. Click the **Enable Edit mode** icon ( $\square$ ) on the top-right of the tab.

A widget layout summary for the dashboard appears.

- 3. Locate the widget you want to configure.
- 4. Click the **Configure Widget** (<sup>@</sup>) control for the widget. For example:

### FIGURE 17 Appliance Health Widget

♦ APPLIANCE HEALTH

A dialog appears which displays all configurable options for the widget.

- 5. Make the required changes and click **Apply**.
- 6. (Optional) Click **Undo Changes** ( $\Omega$ ) to reset all unsaved changes and close the layout summary.
- 7. Click **Save Changes** ( $\checkmark$ ) to save all changes and close the layout summary.

## **Controlling Widget Presentation**

You can control individual widgets to control the way that each presents its information:

- "Widgets: Tabular Only" on page 20.
- "Widgets: Mixed Tabular and Graphs" on page 20.
- "Widgets: Graph Only" on page 21.

### Widgets: Tabular Only

A widget that only includes tabular information appears as follows:

FIGURE 18	Tabular Widget Presentation
-----------	-----------------------------

APPLIANCE CONCURREN	NT USERS	$\bigcirc \frac{\downarrow}{\uparrow}$
		Export
Appliance Name	Users Count	
test_97	17	
test_94	11	
test_91	9.	
test_92	4	

Click **Export** to save the contents of the table as a Comma Separated Value (CSV) file, see **"Exporting Dashboard Information" on page 21**.

#### Widgets: Mixed Tabular and Graphs

A widget that includes both tabular and graph information appears as follows:

FIGURE 19 Tabular and Graph Widget Presentation

In this widget:

- Click **Graph** (<sup>16)</sup>) to switch to a specific line graph view. There may be multiple graphs for a widget.
- Click **Pie Chart** ( ) to switch to a specific line graph view. There may be multiple charts for a widget.
- Click **Table** (<sup>16</sup>) to switch to a specific line graph view. There may be multiple tables for a widget.
- Click Download (<sup>(\*)</sup>) to save the contents of the table as a PDF file, see "Exporting Dashboard Information" on page 21.

### Widgets: Graph Only

A widget that only includes graph information appears as follows:

FIGURE 20	Graph Widget Presentation
IIGONE 20	diupri maget i teschadori

Click **Download** (<sup>(\*)</sup>) to save the contents of the table as a PDF file, see **"Exporting Dashboard Information" on page 21**.

# **Exporting Dashboard Information**

There are three ways of exporting graphical information from the **Dashboard**:

• Each tab within the **Dashboard** has a **Download Report** button. Click this button to create and download a multi-page PDF report that includes each widget that currently displays a populated graph.

**Note:** This report does not include tabular widgets or mixed-format widgets that currently display tabular information.

- Each tab within the **Dashboard** has a **Send Report** button. Enter an email address and click this button to create and send the graph via email.
- Most table-only widgets include an **Export** button. Click this button to produce a Comma-Separated Value (CSV) file of the tabular data.
- Most graph widgets include a **Download** (\*) button. Click this button to produce a PDF report that contains the widget.

# Appliance Management

•	Registering an Existing PCS/PPS Appliance	23
•	Configuring an Appliance to Connect to Pulse One	28
•	Configuring CPU, Memory and Disk Utilization	30
•	Working with Appliance Groups	31
•	Viewing the Activities Log for an Appliance	41
•	Viewing the Configuration Change History for an Appliance	42
•	Comparing Appliances	43
•	Rebooting an Appliance	44
•	Removing an Appliance from Pulse One	46
•	Preparing a Target Appliance	47
•	Removing an Appliance from an Appliance Group	47
•	Editing an Appliance Group	48
•	Deleting an Appliance Group	50

# **Registering an Existing PCS/PPS Appliance**

After Pulse One is installed and configured, the next step is to register one or more PCS/PPS appliances.

Note: This process requires sufficient appliance licensing capacity.

To register an existing appliance:

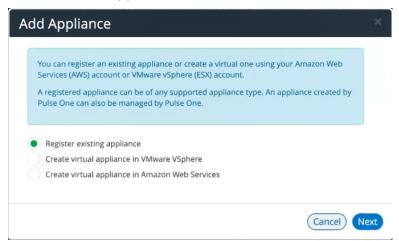

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

3. Click Add Appliance.

#### The Add Appliance dialog box appears.

FIGURE 21 A	dd Appliance
-------------	--------------

4. Select Register existing appliance and click Next.

The Register Appliance dialog appears.

FIGURE 22 Register New Appliance

Register New Appliance	×				
Name:	]				
ADDITIONAL INFORMATION					
Appliance URL: https://myvpnbox.net					
Pulse One uses Device Management Interface (DMI) to perform software upgrades of registered <b>Pulse Connect Secure</b> and <b>Pulse Policy Secure</b> appliances. DMI is an extension to the NETCONF network management protocol. Click here to learn more about DMI configuration on an appliance.					
IP Address: Port:					
Username:					
Password: Password					
Cancel	ave				

5. Enter the required **Name** for the appliance. For example: *appliance.pcs*.

- 6. Enter the management interface address of the appliance as the **Appliance URL**. Typically, this URL will end with "/admin".
- 7. (Optional) If you want the appliance to support Device Management Interface (DMI) software upgrades directly from Pulse One:
  - For **IP Address**, specify the IP Address on which the appliance is configured to receive DMI requests. This is either the internal interface or the management interface.
  - For **Port**, specify the port on which the appliance is configured to receive DMI requests. Typically, this is 830.
  - Specify the required admin **Username** and **Password** for the appliance. This will be used to receive DMI requests.

#### Note:

**Note:** DMI does not need to be configured for ESAP package uploads to appliances.

8. Click Save.

A dialog displays the required **Registration Host** and a **Registration Code**. For example:

FIGURE 23 Registration Required

Registration Required									
0	Use Registration Host : with the following Registration code : to register your appliance.								
	OK								

- 9. Record the **Registration Host** and **Registration Code** and close the dialog.
- 10. Switch to the appliance application (for example, PCS) and enter the **Registration Host** and a **Registration Code** in the appliance's panel, see **"Configuring an Appliance to Connect to Pulse One" on page 28**.

When the auto-registration process is complete, the appliance is added to Pulse One. The Pulse One console displays the appliance status as *Connected* in the **Appliances** list.

## **Editing Appliance Information**

To edit appliance information:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

- 3. Select the required appliance from the list and click its **Actions** icon ( <sup>‡</sup> ).
- 4. From the menu options, select **Edit Appliance Info**.
- 5. In the **Edit Appliance Info** dialog, make the required changes.

FIGURE 24 Edit Appliance Information

Name:	Pulse	e-Example-PCS-1	
ADDITION	IAL INF	ORMATION	$\sim$
Appliance URL:		https://myvpnbox.net	

**Note:** If you want the Launch Appliance UI option to be available on the **Actions** menu for the appliance, specify the **Appliance URL**. This URL typically ends with "/admin".

6. Click **Save** to update the appliance.

## Launching the User Interface for an Appliance

You can launch the administration user interface for a registered appliance directly from the **Appliances** tab.

To support this, ensure that you have specified an **Appliance URL** property for the appliance. Where no **Appliance URL** is specified for an appliance, you can manually edit the appliance properties to specify one, see **"Editing Appliance Information" on page 26**.

To launch the admin UI for an appliance.

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

- 3. Select the required appliance from the list and click its **Actions** icon (  $\stackrel{\flat}{}$  ).
- 4. From the menu options, select Launch Appliance UI.

The graphical user interface for the appliance starts in a new tab of your browser.

## **Recognizing Critical Vulnerabilities**

On Pulse One, the Appliances list displays all registered appliances. Summary information for each appliance includes a **Version** number for the appliance. A warning flag appears beside the version number if the version has known critical vulnerabilities. For example:

	Secure <sup>®</sup>		DASH	IBOARD AI	PPLIANCES	WORKSPACES

## Configuring an Appliance to Connect to Pulse One

After you have added an appliance record into Pulse One:

- Complete the Pulse One registration from the appliance, see **"Completing Registration of an Appliance" on page 28**.
- Configure the ActiveSync handler on the appliance as required, see **"Configuring ActiveSync Handler" on page 28**.

## **Completing Registration of an Appliance**

To complete registration of an appliance in Pulse Connect Secure:

- 1. Log into the PCS/PPS appliance.
- 2. Select the System > Configuration > Pulse One > Settings tab.
- 3. Enter the **Registration Host** and **Registration Code**.

Note: These were displayed during "Registering an Existing PCS/PPS Appliance" on page 23.

4. Click Save Changes.

The Status Information displays the Registration Status in green.

FIGURE 27 Pulse Connect Secure: Pulse One Settings

Y	Status	Information

### Configuring ActiveSync Handler

The Pulse Connect Secure gateway can act as an ActiveSync proxy for Mobile devices that are onboarded through Pulse Workspace Server. Pulse Connect Secure gateway will:

- Filter out and reject ActiveSync connection requests coming from unauthorized Mobile devices.
- Allow only those devices that have been successfully provisioned on Pulse Workspace Server.

To configure ActiveSync handler, in the Connect Secure Device screen:

- 1. Start the appliance user interface.
- 2. Select the System > Configuration > Pulse One > Command Handlers tab.

The Pulse Workspace Handler screen appears.

FIGURE 28 Pulse Connect Secure: Command Handlers

Group Lookup Ha	undler Configura							
Select Authentication			<b>kup</b> .uth Servers:					
(none)	Add -> Remov		▲ S ▼	elect only one authentic	ation server per domain			
Save Changes								

- 3. Select a role where secure email is enabled.
- 4. Select authentication servers to use for group look up and click **Add**.
- 5. (Optional) To delete the device records set by the Pulse Workspace Console Server, click **Clear Active Sync Device Records**.
- 6. Click Save Changes.

**Note:** To create a user rule, refer to the Pulse Connect Secure Administration Guide available at: **https://** www.pulsesecure.net/techpubs.

After you register a PCS appliance, it regularly sends the following information to Pulse One:

- Non-Hardware-specific PCS XML configuration. (Sent to On-Prem/Appliance and SaaS/Cloud)
- Hardware-specific PCS XML configuration. (Sent to On-Prem/Appliance and SaaS/Cloud)

**Note:** Hardware-specific PCS XML configuration is not shared during configuration distribution.

- General information. That is, PCS health, statistics (such as CPU, network throughput), licensing details, cluster information and so on. (Sent to On-Prem/Appliance and SaaS/Cloud)
- User sign-in history. That is, logins from both web and the Pulse client. (Sent to On-Prem/Appliance only)
- User and System binary configuration. (Sent to On-Prem/Appliance only)

# Configuring CPU, Memory and Disk Utilization

The **Appliances** tab displays all the added appliances. When you select an online appliance, a detailed panel shows the health of the appliance.

The panel shows the following status:

- CPU, memory and disk utilization.
- The number of concurrent users connected.
- The throughput of the appliance.
- The number of authentication failures.

To view the health of an appliance:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

3. Select an appliance whose **Pulse One Status** is *Connected*.

The panel on the right gives a pictorial representation of the CPU, memory, and disk usage information. For example:

#### FIGURE 29 Appliance Health

## Working with Appliance Groups

Two or more appliances can be collected into an appliance group to enable group operations:

- "Creating an Appliance Group" on page 31.
- "Adding Appliances to an Appliance Group" on page 35.
- "Distributing a Master Configuration" on page 36.

#### **Creating an Appliance Group**

An Appliance Group uses a single base configuration from a *master* appliance in Pulse One and applies that configuration to all the other *target* appliances in the group. This master appliance is always used to change the configuration settings for the group. You can add appliances to the group or remove appliances from the group at any time.

All appliances in a group must run the same firmware version and must be the same appliance type as the master. However, the appliance group may contain member appliances using any form factor.

Examples:

- If the master is a Pulse Connect Secure appliance running firmware version 8.2R5, all other appliances in the group must also be Pulse Connect Secure either virtual appliances or hardware appliances (PSAs, MAGs, and SAs) that also run firmware version 8.2R5.
- If the master is Pulse Policy Secure, all other appliances in the group must also be Pulse Policy Secure.

To create an appliance group:

- 1. Select the **Appliances** menu.
- 2. Select the **Config Groups** tab.
- 3. Click Create Appliance Group.

FIGURE 30 Create Appliance Group

Cancel				< Previous Next >

- 5. In this wizard panel:
  - Enter the **Group name** and a **Description**.

Note: The Group name should be at least 3 characters and not more than 50 characters.

• Enter a common admin **Username** and **Password** for all the appliances under this group, with which all appliances can receive DMI requests from Pulse One.

**Note:** These credentials must be valid for all group members.

- Specify a common **Port** number on which all appliances under this group will receive DMI requests. The default value is 830.
- 6. Click Next.

The **Group configuration settings** panel of the wizard appears.

FIGURE 33 Group Configuration Settings Wizard Panel

Create Appliance (	Group

Cancel			< Previous Next >

- 7. In this panel:
  - For **Select master appliance**, select an appliance to be the master appliance.

**Note:** An appliance can be configured as master appliance in one or more groups.

- Enter the **Master appliance URL**. This is the Internet-facing admin login URL. For example: https://<ip\_address>/admin
- Select the configuration settings that must be shared between all group members.

8. Click Next.

The **Summary** panel of the wizard appears. For example:

Introduction	Group name and description	Group configuration settings	Summary
ummary			
Group name:	pps_group		Edit
Description:			Edit
Username:	10000		Edit
Password:			Edit
Port:			Edit
Master appliance:	Ade_Pulse-106		Edit
Master appliance URL:	https://10.64	/admin	Edit
Group config settings:	99		Edit

- 9. (Optional) If you want to make any changes, click on the corresponding **Edit** link and make the changes.
- 10. Click **Finish**.

The new appliance group is listed in the **Appliances** page. For example:

FIGURE 35	New Appliance Group
-----------	---------------------

		DASHBOARD APPL	IANCES ANALYTICS	ADMINISTRATION	
Appliances	APPLIANCES	CONFIG GROUPS	SOFTWARE	BACKUP-RESTORE	SCHEDULED TASKS
Appliance Configuration Groups       Name     Status       pps-group     In Sync		( In Sync ) Publish Group Configurati			Actions •
	+ Add Appliance Status Name	Config St	ate Last Co	nfig Upload	١

You can now add appliances to the group as target appliances, see **"Adding Appliances to an Appliance Group" on page 35**.

#### Adding Appliances to an Appliance Group

To add an appliance into an appliance group as a *target* appliance:

- 1. Select the **Appliances** menu.
- 2. Select the **Config Groups** tab.
- 3. Select the appliances group to which you want to add the appliance.

The right-hand panel updates to show group details.

4. Select the Target Appliances tab. For example:

FIGURE 36 Target Appliances Empty

	+ Add Appliance					
	Status Name	Config State	Last Con	fig Upload	٢	
						- 1

5. Click Add Appliance. A dialog appears.

FIGURE 37 Select Target Appliance

6. In this dialog, select an appliance to be added as a target appliance to the selected group.

**Note:** Group configuration is only supported for appliances that are of same security appliance type and running the same software version.

7. Click **Save** to add the appliance to the group.

8. Repeat steps 5, 6 and 7 until the group contains all required target appliances. For example:

FIGURE 38	Target Appliances Added

#### **Distributing a Master Configuration**

This section details the steps to distribute the configuration of the master appliance to all target appliances.

- "Viewing Configuration Changes" on page 36.
- "Publishing Configuration Changes Manually to Group Members" on page 37.
- "Publishing Configuration Changes to Group Members as a Scheduled Task" on page 39.

#### **Viewing Configuration Changes**

To view configuration changes between the master appliance and target appliances, click the **View Changes** button. The button changes to **Close Changes**. The configuration changes will be displayed on the same page.

#### FIGURE 39 View Configuration Changes

To close the configuration changes view, click **Close Changes**.

#### Publishing Configuration Changes Manually to Group Members

If the configuration of the master appliance differs from the configuration of the target appliances in its group, a *Publish Required* notification is displayed, and the **Publish All** button is enabled.

**Note:** Publishing to a group can also be performed as a scheduled task for groups. See **"Publishing Configuration Changes to Group Members as a Scheduled Task" on page 39**.

To manually publish a configuration to all appliances in a group:

- 1. Select the **Appliances** menu and then the **Config Groups** tab.
- 2. In the Appliance Group panel, click **Publish All**.

#### FIGURE 40 Publish All

E <b>Pulse Secure</b> PULSE ONE	D	ASHBOARD APPLIANCES	ANALYTICS A	DMINISTRATION		Q admin

The **Configuration Changes** view closes if it is open.

A confirmation dialog appears.

3. In the confirmation dialog, click **Yes** to confirm the publication.

Pulse One then publishes the master appliance configuration to the target appliances within the group.

4. To view configuration mismatch scenarios, click the **View Changes** button and then click the **Apply Group Config** button. The **Publish All** button will be disabled.

The **Configuration Changes** panel shows the changes in the member appliance configuration compared to the master configuration.

- 5. You can either:
  - Retain the changes by clicking Keep Non-compliant, OR
  - Apply the group configuration by clicking Apply Group Config.

In either case, the compliance conflict is ignored, and the configuration will be published.

6. If you choose to remain non-compliant, then the *Configuration Mismatch* notification changes to a *Mismatch Ignored* notification, indicating that it is intentionally being kept out of compliance.

FIGURE 42 Configuration Mismatch

#### Publishing Configuration Changes to Group Members as a Scheduled Task

If the configuration of the master appliance differs from the configuration of the target appliances in its group, a *Publish Required* notification is displayed.

To publish configuration changes at a specific time, you can create a scheduled task to perform this action.

**Note:** Publishing configuration changes to an appliance group can also be performed manually, see **"Publishing Configuration Changes Manually to Group Members" on page 37**.

To publish configuration changes from a master appliance to all target appliances as a scheduled task:

- 1. Select the **Appliances** menu and then the **Config Groups** tab.
- 2. Click the **Actions** icon (<sup>§</sup>) for the appliance group you want to upgrade, and then click **Schedule Task**.

The **Create Task** dialog appears.

FIGURE 43 CI	reate Publish	Configuration	Task

- 7. (Optional) You can edit the details for a scheduled task by clicking the **Edit** icon ( $\square$ ) for the task.
- 8. (Optional) You can cancel a scheduled task by clicking the **Delete** icon for the task.
- 9. (Optional) You can monitor the progress of scheduled tasks using one of the following methods:
  - On the **Scheduled Tasks** tab. Here, the **Task Status** updates as a task starts and proceeds through to completion.
  - From the **Appliance Activities** panel. To access this, click the **Administration** tab, and then the **Appliance Activities** option.
  - From the **Config Group** tab, you can see status updates for the group as a whole.
  - From the **Appliances** tab, you can see status updates for each appliance group member.
  - From the **Activities** panel for an individual appliance on the right side of the **Appliances** tab.

## Viewing the Activities Log for an Appliance

Viewing the log details of the activities between the Pulse One console and various appliances will help the Administrator to troubleshoot and resolve any issues. The **Appliances > Activities** panel in Pulse One provides details of appliance reboots, configuration uploads, and so on.

To view the activities log for an appliance:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

- 3. Select an appliance whose **Pulse One Status** is status *Connected*.
- 4. In the panel on the right, expand **Activities** to display details of all activities.

For example:

FIGURE 45 Activities Details

# Viewing the Configuration Change History for an Appliance

The Configuration Changes panel in the Appliances tab provides the configuration change history for each appliance.

To view the configuration changes history:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The Appliances tab displays all current appliances.

- 3. Select an appliance whose **Pulse One Status** is status *Connected*.
- 4. In the panel on the right, select **Configuration History**. This displays the configuration changes history for the appliance, including timestamps for each change.
- 5. Expand the required timestamp to view the changes made at that time. For example:

FIGURE 46 View Configuration Changes

### **Comparing Appliances**

The Compare Appliances feature allows you to compare two appliances based on their settings.

To compare two appliances:

1. Log into Pulse One as an administrator.

FIGURE 47 Compare Appliances

2. Click the **Appliances** menu and then the **Appliances** tab.

The **Appliances** tab displays all current appliances.

- 3. Select the source appliance that you want to compare and click its **Actions** icon ( $\square$ ).
- 4. On the drop-down menu, click **Compare Appliances**.

FIGURE 48 Appliance Configuration Comparison

#### **Rebooting an Appliance**

Rebooting an appliance is necessary when the services on the appliance must be restarted, or when there are other issues with an appliance that must be resolved.

After the reboot, the appliance will connect back to the network and Pulse One will indicate the status of the appliance in the dashboard.

To reboot an appliance:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The **Appliances** tab displays all current appliances.

3. Select the appliance that you want to reboot and click the **Actions** icon ( $\frac{1}{2}$ ).

4. On the drop-down menu, click **Reboot Appliance**.

FIGURE 49	Reboot Appliance

The **Reboot Appliance** confirmation dialog appears.

5. Ensure that you have selected the correct appliance and click **Yes**.

The selected appliance reboots.

## Removing an Appliance from Pulse One

If you no longer want to use an appliance with Pulse One, or want to re-provision it, you can remove the appliance.

To remove an appliance:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Appliances** menu and then the **Appliances** tab.

The **Appliances** tab displays all current appliances.

- 3. Select the appliance that you want to remove and click its **Actions** icon ( <sup>‡</sup> ).
- 4. Click **Remove Appliance to remove the appliance from Pulse One.**

FIGURE 50 Remove Appliance

**Note:** For PCS appliance virtual machines on either vSphere or AWS, an additional command is available. Click **Destroy Appliance** to remove the appliance from Pulse One, and to also destroy the appliance on the vSphere/AWS platform.

The **Remove Appliance From Pulse One** confirmation dialog appears.

5. Click **Yes** to remove the selected appliance.

# **Preparing a Target Appliance**

This section details the steps to add an agent instance for the target appliance, and a checklist for preparing the target appliance for configuration distribution.

#### Preparing an RSA Agent Instance for the Target Appliance

The Pulse One administrator must ensure that the *sdconf.rec* file is uploaded to the master appliance that contains the agent instance for the target appliance.

To add a new target appliance:

- 1. In **RSA Authentication Manager**, add the agent instance for the target appliance.
- 2. Download the *sdconf.rec* file.
- 3. Upload the *sdconf.rec* file to the master appliance.

**Note:** Some configuration blocks that are distributed by Pulse One may refer to other blocks that are not distributed. In such cases, the configuration distribution fails at the target appliance while importing the configuration. The administrator must manually configure the target appliance before distributing the configuration through Pulse One.

A checklist for preparing the target appliance for configuration distribution is provided in **"Appendix: Checklist for Preparing a Target Appliance" on page 81**.

## Removing an Appliance from an Appliance Group

You can remove any appliance other than the master appliance from the appliance group.

This section details the steps to remove an appliance from the group.

To remove an appliance from the group:

- 1. Select the **Appliances** menu.
- 2. Select the **Config Groups** tab.

A list of configuration groups is displayed.

- 3. Select the group from which the appliance needs to be removed.
- 4. Select the Target Appliances tab.
- 5. Click the **Actions** icon ( $\frac{1}{2}$ ) for the appliance you want to remove.

FIGURE 51 Remove from Group

6. From the menu options, select **Remove from Group**. For example:

	Pulse Secur	e	D	ASHBOARD A	PPLIANCES ANAL	LYTICS A	DMINISTRATION

An alert message confirms the removal of the appliance from the group.

## **Editing an Appliance Group**

This section details the steps to modify an appliance group.

To edit an appliance group:

- 1. Select the **Appliances** menu.
- 2. Select the **Config Groups** tab.

A list of configuration groups is displayed.

3. Select the group that you want to modify and click its **Actions** (<sup>§</sup>) icon.

4. From the menu options, select **Edit Group Configuration**.

#### FIGURE 52 Edit Group Configuration

- 5. Work through the wizard, making the required changes to the group name, master appliance, and configuration settings.
- 6. Click Finish.

# **Deleting an Appliance Group**

This section details the steps to delete an appliance group.

Note: The appliances within the appliance group are not deleted when you the delete the group, and can be viewed as normal in the **Appliances** tab.

- 1. Select the **Appliances** menu.
- 2. Select the **Config Groups** tab.

A list of all configuration groups is displayed.

3. Click the group that you want to delete and click its **Actions** icon (  $\stackrel{\circ}{\epsilon}$  ).

- 4. From the menu options, select **Delete Group**.
- 5. In the **Delete Group** confirmation window, click **Yes** to delete the group.

# Viewing Analytics and Reports

•	Viewing the Login Attempts Report	51
•	Viewing the Appliance Health Report	52
•	Viewing the Appliance Activities Report	53
•	Viewing Appliance Activities	54

# Viewing the Login Attempts Report

To view the Login Attempts report:

- 1. Select the **Analytics** menu.
- 2. Select Login Attempts.
- 3. From the Login Attempts drop-down, select one or more appliances for the report.
- 4. Select the graph type.

The report shows the login attempts, authentication mechanism and result, and device OS in the last 24 hours.

#### FIGURE 55 Login Attempts Report

- 5. (Optional) Choose bar chart, line graph, pie chart or table data for each graph.
- 6. (Optional) Click **Export** to download displayed information as a .csv format file.

#### Viewing the Appliance Health Report

To view the **Appliance Health** report:

- 1. Select the **Analytics** menu.
- 2. Select **Appliance Health**.
- 3. From the **Appliance Health** drop-down, select one or more appliances for the report.

The following reports for the selected appliance over the last 24 hours are displayed:

- CPU Utilization
- Memory Utilization
- Disk Utilization
- Network Throughput (kb/s)

For example:

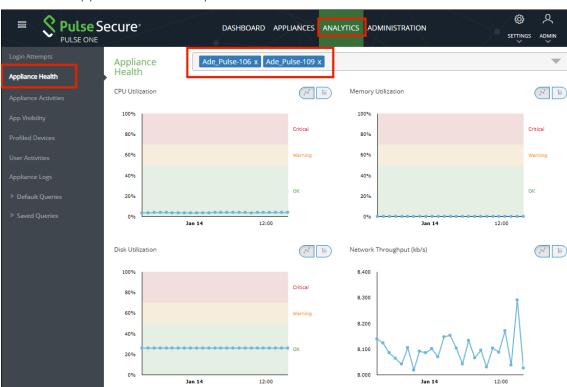

FIGURE 56 Appliance Health Report

# Viewing the Appliance Activities Report

To view the **Appliance Activities** report:

- 1. Select the **Analytics** menu.
- 2. Select Appliance Activities.
- 3. From the **Appliance Activities** drop-down, select the required filter (*Critical, Alert, Notice,* and so on) for the report.

# User Management

•	Adding an Admin User	55
•	Editing User Details	56
•	Removing an Admin User	57
•	Resetting a User Password	57
•	Suspending a User	58

## Adding an Admin User

To add an admin user:

1. Select the **Administration** tab.

FIGURE 60 Add Admin User

2. Select User Management.

A list of existing admin users is displayed.

3. Click Add User to add an admin user.

The Add Admin User window appears.

Username:	po-user1	
Role	Read Only Admin	~
Full Name:	Pulse One User-1	
Email:	pouser1@company.com	
Sign In Method:	Enterprise SSO	~

**Note:** If Role is set to **Read Only Admin**, then the user will not be given the permissions to create/ update/ delete functions.

- 4. In the Add Admin User window, enter the Username, Full Name and Email for the user.
- 5. Select a **Role** from the drop-down list:
  - *Super Admin* This role has full access to the admin console. Super admin can create other admins.
  - *Read Only Admin* This role has read-only access to the entire system. Read-only admin can view dashboard and report, perform search function, and run pre-defined queries.

- 6. Select a Sign in Method. Either:
  - Select **Enterprise SSO** if the same user ID exists on both Pulse One (Service Provider) and the Pulse Connect Secure (Identity Provider), OR
  - Select Local Authentication.
- 7. Click **Create**. The new user is displayed in the list of users.

#### **Editing User Details**

To modify a user's details:

- 1. Select the **Administration** tab.
- 2. Select User Management.

A list of existing admin users is displayed.

- 3. Select the user from the list.
- 4. In the user details panel click the **Edit** icon and make the required changes.

#### 5. Click **Update**.

## Removing an Admin User

To remove an admin user:

- 1. Select the **Administration** tab.
- 2. Select User Management.

A list of existing admin users is displayed.

- 3. Select the user from the list.
- 4. Click **Delete User**.
- 5. In the **Remove Admin User** confirmation message box, click **OK**.

The user is removed as an administrator.

#### **Resetting a User Password**

To reset a user's password:

- 1. Select the user from the list.
- 2. Click the **Reset login** link in the user details pane.

An email that contains the **Set new password** link will be sent to the registered email address.

- 3. Click the Set new password link in the email.
- 4. In the Pulse One page that appears, provide the new password and confirm the new password. The new password will be saved in the database.
- 5. Then log in to Pulse One with the new password.

**Note:** The **Set new password** link that you received in the email has an expiration time of 1 hour. Beyond this time, you should make a new request for setting the new password.

FIGURE 62	Reset Login

			Status:	Unlocked	

# Suspending a User

To suspend an admin user:

- 1. Select the user from the list.
- 2. Click Suspend User.

The user will be locked and will not be able to log in.

The Forgot Password option in the Login page will not send email to reset the password.

3. (Optional) To unlock the suspended user, select the user and click **Reset Login**. This will send a mail to the user with a set new password link.

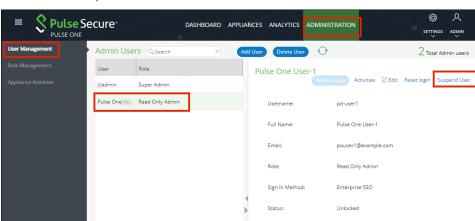

FIGURE 63 Suspend User

# Role Management

•	Adding an Admin Defined Role	59
•	Editing an Admin Role	60
•	Removing an Admin Role	60

### Adding an Admin Defined Role

To add a new admin-defined role:

- 1. Select the **Administration** tab.
- 2. Select Role Management.
- 3. Click Add Role to add a new admin-defined role.

Note: To create a role from an existing role, click **Duplicate** corresponding to the existing role.

- 4. In the Create New Role window, enter the role name.
- 5. In the **Role Assignment** section, select the permissions for *Dashboard*, *Appliances*, *Settings*, *Users*, and *Roles* from the drop-down list.
  - *None* This permission disables the assigned feature. For example, if the *Appliances* permission is set to *None*, then **Appliances** page will not be visible in Pulse One console for this role.
  - *Read Only* This permission will disable create/edit/delete options for the assigned feature.
  - *Edit* This permission allows create/view/edit operations.
  - Delete This permission allows all operations.

#### FIGURE 64 Create New Role

Role Name:	PO User1 Role		
Role Assignment

# **Editing Pulse One Properties**

To edit a Pulse One property:

- 1. View Pulse One properties, see Viewing Pulse One Properties<XREF>.
- 2. Click the **Edit** ( $\square$  button corresponding to the field you want to edit.
- 3. Change the value and then click **Save**. For example:

## **Understanding Pulse One Properties**

All Pulse One properties are described in the following sections:

- "Enterprise Connection Properties" on page 62
- "Password Properties" on page 62
- "Miscellaneous Properties" on page 63
- "Session Properties" on page 63

#### **Enterprise Connection Properties**

The Enterprise Connections settings are described below:

- Auto Configure SAML Settings Boolean. If *True*, Pulse One automates the SAML Metadata configuration flow for both Appliance and Pulse One SAML settings.
- **Create Users and Roles from SAML** Boolean. If *True*, a Pulse One user is created automatically whenever a user from a linked SAML idP (PCS) authentication server logs into Pulse One for the first time using Enterprise SSO.

**Note:** Further configuration is required to use this feature, see **"Automatically Creating Pulse One Users for SAML SSO Logins" on page 78**.

- **SAML Identity Provider** The Pulse Connect Secure appliance that is configured for Pulse One server SAML auto-provisioning.
- **SAML Identity Provider Metadata** Required metadata for the SAML identity provider.
- **SAML Service Provider Metadata** Required metadata for the SAML service provider.

#### **Password Properties**

The **Password** settings are described below:

- Console Minimum Password Length The minimum length of a console password.
- **Console Password Expiration Days** The number of days after which an Administrator must change their console password.
- **Console Password Require Lowercase** Boolean. If *True*, the console password must contain at least one lowercase letter.
- **Console Password Require Number** Boolean. If *True*, the console password must contain at least one number.
- **Console Password Require Special** Boolean. If *True*, the console password must contain at least one special character.

- Console Password Require Uppercase Boolean. If *True*, the console password must contain at least one uppercase letter.
- **Console Password Reset Timeout Hours** The number of hours a console password reset email link is valid.
- **Domain Allowed Password Attempts** The number of login attempts until a console account is locked.
- Welcome Timeout Hours The number of hours a registration token in a welcome email is valid.

#### **Miscellaneous Properties**

The miscellaneous (Misc) settings are described below:

- Created On The date on which the management console was created.
- Locale The console language code.
- Page Footer The footer information that will be displayed at the bottom of the admin console.
- **Server Version** The current Management Server version that will be displayed at the bottom of the admin console.

Note: You cannot edit the Created On and Server Version properties.

#### **Session Properties**

The Session properties are described below:

• Session idle timeout (minutes) – The timeout for an idle session. After this timeout is reached, the user is logged out automatically. The default is 20.

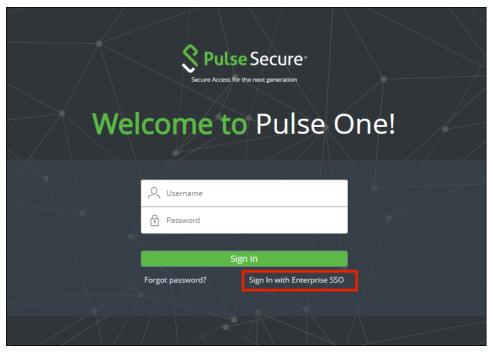

# Configuring Enterprise SSO Using SAML

•	Overview	65
•	Configuring SAML idP in Pulse Connect Secure Server	66
•	Automatically Configuring a SAML idP on Pulse One	70
•	Configuring a Metadata Provider in Pulse Connect Secure	72
•	Enabling Enterprise SSO in Pulse One Appliance	73
	Configuring SAML Metadata in Pulse One	
•	Adding SAML SP Metadata in Pulse Connect Secure Server	74
	Automatically Creating Pulse One Users for SAML SSO Logins	
•	Testing Sign In with Enterprise SSO	80

### Overview

By setting up Enterprise Single Sign On (SSO) with SAML, Enterprise users can sign into Pulse One by delegating authentication to their Pulse Connect Secure appliance.

FIGURE 68 Sign In with Enterprise SSO

If your authentication is performed by a PCS appliance at v8.3r1 or later, many of the configuration steps are automated. You must perform the following processes:

- "Configuring SAML idP in Pulse Connect Secure Server" on page 66.
- "Automatically Configuring a SAML idP on Pulse One" on page 70.
- (Optional) "Automatically Creating Pulse One Users for SAML SSO Logins" on page 78.
- "Testing Sign In with Enterprise SSO" on page 80.

If your authentication is performed by a PCS appliance that is earlier than v8.3r1, you must perform all stages of the following manual processes:

- "Configuring SAML idP in Pulse Connect Secure Server" on page 66.
- "Configuring a Metadata Provider in Pulse Connect Secure" on page 72.
- "Enabling Enterprise SSO in Pulse One Appliance" on page 73.
- "Configuring SAML Metadata in Pulse One" on page 73.
- "Adding SAML SP Metadata in Pulse Connect Secure Server" on page 74.
- (Optional) "Automatically Creating Pulse One Users for SAML SSO Logins" on page 78.
- "Testing Sign In with Enterprise SSO" on page 80.

### Configuring SAML idP in Pulse Connect Secure Server

**Note:** This section is required for all PCS appliance versions.

This section provides the steps to configure a SAML Identity Provider on Pulse Connect Secure server.

Before proceeding with the configuration, ensure that the Pulse Connect Secure appliance that you intend to use as the Identity Provider is registered with Pulse One, see **"Registering an Existing PCS/PPS Appliance" on page 23**.

**Note:** If the PCS server is already configured as a SAML identity provider, make sure that POST binding is enabled and the **Accept Unsigned AuthnRequest** option is selected.

To configure SAML IdP on the Pulse Connect Secure server:

- 1. Log in to the Pulse Connect Secure server that is identified as an Identity Provider.
- 2. Navigate to **System > Configuration > SAML > Settings**.

3. Configure the following Metadata Server Configuration:

FIGURE 69 SAMI Settings

- Timeout value for metadata fetch request to 300.
- Host FQDN for SAML to the Fully Qualified Domain Name, noting the host FQDN guidance below.

0				Puise Connec	t Secure	
X Pulse Secure						<b>.</b>
System	Authentication	Administrators	Users	Maintenance	Wizards	
SAML> Settings ∀ Metadata Server Configuration						
Timeout value for metadata fetch request 300 seconds	1 - 600. Specifies	the time in seconds to wait	for response o	f SAML metadata fetch r	equest.	
Validity of uploaded/downloaded metadata file: 0 days		the time in days after which force any validity on the p			expires. O means the	at Connect
Host FQDN for SAML: connect.nbtc.com	The FQDN used fo	or generating URLs for SAI	IL services.			
Alternate Host FQDN for SAML:	The FQDN used fo	or generating SA's Single S	ign-On Service	URL when Pulse(NC) S	ession detection is	enabled.
Save Changes Cancel Update Entity Ids						

The host FQDN specified here is used in the SAML entity ID, used by browsers to connect to PCS, and used in the URLs for SAML services. Typically:

- If the PCS is standalone, the FQDN should resolve to the IP address of the external interface / internal interface, whichever is chosen.
- If the PCS is an Active-Passive cluster, the FQDN should resolve to the external VIP / Internal VIP, whichever is chosen.
- If the PCS is an Active-Active cluster behind an in-line load balancer, the FQDN should resolve to the load balancer's external VIP / Internal VIP, whichever is chosen.
- 4. Click Save Changes.

5. Navigate to **System > Configuration > Certificates > Device Certificate**, create a new CSR, and import certificate and keys. Skip this step if the PCS external interface / internal interface (whichever is chosen) already provides a certificate that matches the host's Fully Qualified Domain Name.

	Sha-256							

- 8. In the Basic Identity Provider (idP) Configuration section, do the following:
  - Select the **Post** check box for protocol binding to use for SAML response.

**Note:** If the PCS server is already configured as a SAML identity provider, make sure that POST binding is enabled and the **Accept Unsigned AuthnRequest** option is selected.

- Select a Signing Certificate from the list.
- For **Decryption Certificate**, select *No Encryption*.
- Clear the Reuse Existing NC (Pulse) Session check box.
- Select the Accept Unsigned AuthnRequest check box.

For more details, refer to the "Configuring Sign-in SAML Identity Provider Settings" section in the *Pulse Connect Secure Administration Guide*.

9. Click **Save Changes** to save the Identity Provider configuration.

## Automatically Configuring a SAML idP on Pulse One

**Note:** This section is only applicable if your PCS appliance is at v8.3r1 or later. If your PCS is at an earlier release, you must perform a number of manual processes, see **"Overview" on page 65**.

To automatically configure a SAML idP, you must have already completed the following tasks:

- Registered the Pulse Connect Secure appliance that you intend to use as the SAML idP with Pulse One, see **"Registering an Existing PCS/PPS Appliance" on page 23**.
- Configured the SAML idP on Pulse Connect Secure, see **"Configuring SAML idP in Pulse Connect Secure Server" on page 66**.

To auto-configure the SAML idP:

- 1. Log into Pulse One as an administrator.
- 2. Click the **Settings** icon on top-right-corner of the page.
- 3. Select Pulse One Properties.

The Pulse One Properties page appears.

4. Expand the Enterprise Connections group to view its properties. For example:

FIGURE 72 Pulse One Properties Enterprise Connections

Pulse One Properties	
Name	Value
Enterprise Connections (5)	
Auto Configure SAML settings	No
Create users and set roles from SAML	No
SAML Identity Provider	
SAML Identity Provider Metadata	
SAML Service Provider Metadata	
± Password (9)	
+ Misc (4)	

5. Set the Auto Configure SAML Properties property to Yes.

**Note:** When you set **Auto Configure SAML Properties** to *Yes*, the **SAML Identity Provider Metadata** and the **SAML Service Provider Metadata** properties are removed. These are not required when auto-configuration is enabled.

6. Set the **SAML Identity Provider** property to match the appliance name, as registered on Pulse One. For example:

FIGURE 73	Pulse One Properties Configure Auto SAML
ITGOILE / 5	i dise one i roperties configure / deo s/ ime

Pulse One Properties	
Name	Value
Enterprise Connections (3)	
Auto Configure SAML settings	Yes
Create users and set roles from SAML	No
SAML Identity Provider	Ade_45_84_SAML
Password (9)	
① Misc (4)	

After this process is complete, auto-configuration of the SAML idP will be performed.

 (Optional) To confirm the auto-configuration of the SAML idP, log into Pulse Connect Secure and access the System > Configuration > SAML settings page. There will now be a Metadata Name called *AutoConfigured*. For example:

FIGURE 74 Pulse Connect Secure SAML Auto-configuration

Ŝ	Pulse S	ecure System Authentication Adminis	strators Users N	laintenance Wizard	ts	Pulse Connect Secu	re <b>1 ~</b>
	Configuration SAML						
Lic	ensing Pulse On	Security Certificates DMI Agent NCF Mobile VPN Tunneling Telemetry	Sensors C	lient Types Pulse Co	Ilaboration Virtual Desktops Use	r Record Synchronization

10	<ul> <li>records per p</li> </ul>	age				Search:	
۵	Metadata Name	Entity Ids	Roles	Valid Till	Status	Metadata Location	Download
	terrorigent."	No. to other start to the starts of an end	SP	2038-01-18 19:14:07		Local	•
	AutoConfigured	https:// /api/v1/saml/sso? realm= /sp-metadata	SP	2038-01-18 19:14:07		Local	•

The auto-configuration of the SAML idP is complete.

You can then either:

- Continue with an optional activity "Automatically Creating Pulse One Users for SAML SSO Logins" on page 78.
- Move directly to testing the SSO login, see "Testing Sign In with Enterprise SSO" on page 80.

## Configuring a Metadata Provider in Pulse Connect Secure

**Note:** You do not have to perform the process in the section if your appliance is at v8.3r1 or later, and you have already performed auto-configuration of SAML, see **"Automatically Configuring a SAML idP on Pulse One" on page 70**.

This section provides the steps to configure Metadata Provider on Pulse Connect Secure.

Note: If the PCS server is already configured to operate as a SAML IdP, skip the steps 2 to 6.

To configure a Metadata Provider in the PCS server:

- 1. Log in to Pulse Connect Secure server.
- 2. Navigate to Authentication > Signing-In > Sign In SAML > Metadata Provider.
- 3. The SAML Metadata Provider **Entity Id** property is pre-populated. It is generated by the system, based on the value for the **Host FQDN for SAML** setting on the **System > Configuration > SAML > Settings** page.
- 4. Set Metadata Validity to 365 days.
- 5. Clear the Do Not Publish IdP in Metadata check box.
- 6. Click Save Metadata Provider.
- 7. Click **Download Metadata** and save the file to your computer.

FIGURE 75 Metadata Provider

*Entity Id:			Unique SAML identifier	of the Connect Secure. By	default uses ho	ost name configured at S	AML Settings.	
*Metadata Validity:	365 days		1 - 9999. Specifies the I	maximum duration for which	h a peer SAML	entity can cache the Cor	nect Secure metada	ata file.
Do Not Publish IdP Download Metadata Save Metadata Prov			Prevents the Connect S	Gecure metadata file to be p	ublished at the	location specified by the	Entity Id.	

## **Enabling Enterprise SSO in Pulse One Appliance**

**Note:** You do not have to perform the process in the section if your appliance is at v8.3r1 or later, and you have already performed auto-configuration of SAML, see **"Automatically Configuring a SAML idP on Pulse One" on page 70**.

To enable Enterprise SSO:

- 1. Log into Pulse One as an administrator.
- 2. Select the **Administration** tab.
- 3. Select User Management.
- 4. In the **User Management** page, add (or edit) all the admin users who need to use Enterprise SSO by setting their corresponding **Sign In Method** to *Enterprise SSO*. For example:

FIGURE 76 Sign In Method

Username:	po-user1	
Role	Read Only Admin	~
Full Name:	Pulse One User-1	
Email:	pouser1@company.com	
Sign In Method:	Enterprise SSO	~

**Note:** To use Enterprise SSO login, the same user identity (username) must exist on both Pulse One (Service Provider) and the Identity Provider (Pulse Connect Secure).

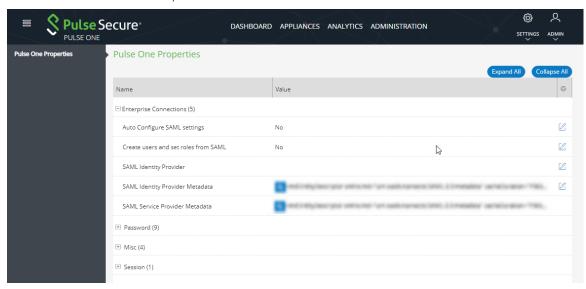

## Configuring SAML Metadata in Pulse One

**Note:** You do not have to perform the process in the section if your appliance is at v8.3r1 or later, and you have already performed auto-configuration of SAML, see **"Automatically Configuring a SAML idP on Pulse One" on page 70**.

To configure metadata in Pulse One:

- 1. In the Pulse One admin console, click the settings icon on top-right-corner of the page and select **Pulse One Properties**.
- 2. Click the **Edit** icon corresponding to **SAML Identity Provider** and select the Pulse Connect Secure appliance that you are setting up as the Identity Provider.
- 3. Click the Edit icon corresponding to SAML Identity Provider Metadata.

- Copy the contents of the metadata file that you downloaded from Pulse Connect Secure, paste it into the Edit Property window, and click Save. The SAML Service Provider Metadata will automatically be populated.
- 5. Click **SAML Service Provider Metadata**, copy the metadata content, paste it into a file such as *saml-metadata-pws.xml* and save the file to your computer. This file will be used when configuring Pulse Connect Secure later.

#### FIGURE 77 Pulse One Properties

### Adding SAML SP Metadata in Pulse Connect Secure Server

**Note:** You do not have to perform the process in the section if your appliance is at v8.3r1 or later, and you have already performed auto-configuration of SAML, see **"Automatically Configuring a SAML idP on Pulse One" on page 70**.

This section provides the steps to add SAML Service Provider metadata in PCS server.

- 1. Navigate to System > Configuration > SAML.
- 2. Click New Metadata Provider.
- 3. Enter a Name for the metadata provider.

- 4. Under Metadata Provider Location Configuration:
  - For Location, select Local.
  - For **Upload Metadata File**, click **Browse** and select the SP metadata file *saml-metadata-pws.xml* that you saved on your computer in the previous process.

"indicates required	field				

14. At the bottom of the page, click **Save Changes**.

SAML configuration is complete.

You can then either:

- Continue with an optional activity "Automatically Creating Pulse One Users for SAML SSO Logins" on page 78.
- Move directly to testing the SSO login, see **"Testing Sign In with Enterprise SSO" on page 80**.

## Automatically Creating Pulse One Users for SAML SSO Logins

Note: This section is optional for all PCS appliance versions.

After you have a linked a SAML idP (PCS) server to Pulse One, users can log into Pulse One using their Enterprise SSO. However, by default there is no Pulse One user created for these Enterprise SSO users. A Pulse One user is required for features such as appliance configuration management, and the addition of workspaces and devices.

You can configure roles on PCS and Pulse One so that a Pulse One user will be created automatically whenever an Enterprise SSO user logs into Pulse One for the first time.

- 1. Log into the PCS appliance.
- 2. Access user roles.
- 3. Create a user role with a name that starts with "Pulse One: ", followed by a defined Pulse One admindefined role. For example:

FIGURE 83 PCS User Roles

User Roles > Pulse One: SAML Role1 > General > Overview	
General Web Files SAM Telnet/SS Overview Restrictions VLAN/Source IP Sessi	
* Name: Description:	Pulse One: SAML Role1

In this example, there must be a role called SAML Role1 on Pulse One.

- Access the SAML idP configuration, see Configuring SAML idP in Pulse Connect Secure Server<XREF>
- 5. In the **Services-Provider-related idP Configuration** section, ensure that there is an **Attribute Statement Configuration** entry that matches the following entry:

FIGURE 84 Attribute Statement Configuration

Attribute Statement Configura	tion			
Attributes to be sent in SA	ML Attribute Statements can	be configured as name-value pa	airs and/or to be fetch	ed from
ame-Value based configu	uration, here values can be sys	stem variables available in SSO	) parameter fields:	
Delete 🕇 🖡				
Attribute Name	Friendly Name	Attribute Value	Value Type	
Attribute Name	Friendly Name	Attribute Value	Value Type Single-Valued	Add
Attribute Name roles	Friendly Name	Attribute Value		Add

6. Log into Pulse One.

- 7. Click the **Settings** icon on top-right-corner of the page.
- 8. Select Pulse One Properties.
- 9. Under Enterprise Connections, ensure that the Create users and roles from SAML property is set to *Yes*.

	ecure Dashboard	APPLIANCES	ANALYTICS	ADMINISTRATION	2	
Pulse One Properties	Pulse One Properties				Expand A	ollapse All
	Name	Value				۲
	Enterprise Connections (3)					
	Auto Configure SAML settings	Yes				Z
	Create users and set roles from SAML	Yes				Z
	SAML Identity Provider					Z
	+ Password (9)					
	+ Misc (4)					

- 10. Select the Administration menu, and then click Role Management.
- 11. Ensure that there is an admin-defined role whose name was referenced in step 3. For example:

FIGURE 86 Pulse One Admin Defined Roles

E Pulse S Pulse ONE	CUIC DASHBOARD APPLIANCES ANALYTICS ADMINISTRATION	
User Management	Role Management Add Role Delete Role	
Role Management	System Defined Roles	3 Roles
Appliance Activities	Read Only Admin Super Admin Workspace User	
	Admin Defined Roles SAML Role1	1 Roles

The configuration is now complete.

Whenever a SAML user logs into Pulse One using their Enterprise SSO, an equivalent Pulse One user is created for them automatically.

**Note:** The user will continue to log in with their Enterprise SSO. However, their Pulse One user will enable them to use features such as appliance configuration management, and the addition of workspaces and devices.

## **Testing Sign In with Enterprise SSO**

To test signing in using Enterprise SSO:

- 1. Navigate to the Pulse One admin login page and click Sign In with Enterprise SSO.
  - FIGURE 87 Pulse One Properties

		se Secure or the next generation	
We	lcome t	o Pulse One!	
	Q Username		
	Password		
	و	sign In	
	Forgot password?	Sign In with Enterprise SSO	

You are navigated to the Pulse Connect Secure login page.

2. Enter your Username and Password, and click Sign In.

FIGURE 88 Pulse Connect Secure Login Page

Secure Secure		
Welcome Pulse C	to onnect Secure	
Username Password		Please sign in to begin your secure session.
	Sign In	

 If this is the first time you're logging in to Pulse One, you are prompted to access the End User License Agreement (EULA). Read and scroll to the bottom of the EULA. Click Agree and you will be signed in to Pulse One using your SAML SSO credentials.

**Note:** If you have configured the automatic creation of Pulse One users from SAML Enterprise SSO users, an equivalent Pulse One user is created for the SAML Enterprise SSO user. See **Automatically Creating Pulse One Users for SAML SSO Logins<XREF>**.

**Note:** The user will continue to log in with their Enterprise SSO. However, their Pulse One user will enable them to use features such as appliance configuration management, and the addition of workspaces and devices.

# Appendix: Checklist for Preparing a Target Appliance

Block Type (which is distributed) (Names as in Pulse One Console)	Requires Preparation of (which is not distributed) (Names as in Appliances Menu	Sample Log Messages	How to Prepare the Target Appliance
Client > Components	Pulse Secure Client > Pulse Secure Versions	Import of configuration from Pulse One returned an Error: [/users/ junos-pulse/component-settings/client-version-settings/active- version] Invalid reference: no 'Client Version' object found with identifier '5.2.1.226'.	Navigate to Pulse Secure Client > Components. Upload the required Pulse Client version.
	Endpoint Security > Host Checker > ESAP Versions		Navigate to Authentication > Endpoint Security > Host Checker. Upload the required ESAP package.
Auth > Realms > Admin, Auth > Realms > User	Auth. Servers (Local Auth Servers are not distributed)		Configure the Local Auth Server
Policies > Tunneling > Bandwidth Mgmt	Network > Internal Port, Network > External Port, Network > Management Port	Import of configuration from Pulse One returned an Error: [/users/ resource-policies/network-connect-policies/network-connector- bandwidth-policy[name=vpm-tun-bandwidth-policy]] Bandwidth Management Not Enabled! The VPN Tunnels Maximum Bandwidth must be configured on the network overview page.	On the network overview page configure VPN Tunnels Maximum Bandwidth.
Policies > Web > Client Auth	Configuration > Certificates	Import of configuration from Pulse One returned an Error: [/users/ resource-policies/web-policies/client-authentications/client- authentication [name=client-auth-policy.parent-type=none]/ certificate] Invalid reference: no 'Client Auth Certificate' object found with identifier 'qa.pulsesecure.net'.	Configure the appropriate CA certificate under System > Configuration > Certificates
Policies > Web > Client Auth	Resource Policies > Email Client		An SAnnnn (for example, SA6500), if it has been configured with Resource Policies > Email Client, should not be a master appliance.
Policies > Web > Compression	Options		On the Options page select "Enable gzip compression"
Policies > Web > Java Code Signing	Configuration > Certificates > Code-signing Certificates		Save the policy with the default code-signing certificates.
Policies > Web > PTP	Network > Overview	Import of configuration from Pulse One returned an Error: [/users/ resource-policies/web-policies/ptp[application=ptp_policy_2,parent- type=none]] Please specify the IVE hostname on the Network Settings page under Network Identify.	Configure a valid hostname under System > Network > Overview.
Policies > Secure Email	Network > Overview	Import of configuration from Pulse One returned an Error: [/users/ resource-profiles/mobile/secure-mail-profiles/secure-mail- profile[virtual-hostname=myhost.myco.com]] Please specify the IVE hostname on the Network Settings page under Network Identify	Configure a valid hostname under System > Network > Overview.
Security	Network Settings > Internal Port > Virtual Port	Import of configuration from Pulse One returned an Error: [/system/ configuration/security/ssl-options] Virtual port number virtual_internal is not a valid Virtual Port	
	Network Settings > External Port > Virtual Port	Import of configuration from Pulse One returned an Error: [/system/ configuration/security/ssl-options] Virtual port number virtual_external is not a valid Virtual Port	
SAML Auth-Server	System > Configuration > SAML > Settings		Configure a valid "Host FQDN for SAML" on the System > Configuration > SAML > Settings page.

Block Type (which is distributed) (Names as in Pulse One Console)	Requires Preparation of (which is not distributed) (Names as in Appliances Menu	Sample Log Messages	How to Prepare the Target Appliance
Signing in > Sign-in SAML	System > Configuration > SAML > Settings	Import of configuration from Pulse One returned an Error:[/ authentication/signin/saml/identity-provider/sp-default- configuration/source-id] Modification of this attribute is not allowed.	Configure a valid "Host FQDN for SAML" on the System > Configuration > SAML > Settings page.
(PPS) Policies > Enforcer > Access	Policies > Enforcer > Connection	Import of configuration from Pulse One returned an Error: Failed to resolve path references. Import of configuration from Pulse One returned an Error:[/uac/infranet-enforcer/resource-access-policy[name=enforcer_access_policy]/infranet-enforcer] Invalid reference: no 'Infranet Enforcer' object found with identifier 'screenOS1'.	
(PPS) Policies > Enforcer > Auth Table Mapping	Policies > Enforcer > Connection	Import of configuration from Pulse One returned an Error: Failed to resolve path references. Import of configuration from Pulse One returned an Error:[/uac/infranet-enforcer/auth-table-mapping-policies/auth-table-mapping[name= auth_table_mapping_policy]/ infranet-enforcer] Invalid reference: no 'Infranet Enforcer' object found with identifier 'screenOS1'.	
(PPS) Policies > Enforcer > IP Address Pools	Policies > Enforcer > Connection	Import of configuration from Pulse One returned an Error: Failed to resolve path references. Import of configuration from Pulse One returned an Error:[/uac/infranet-enforcer/ip-address-pools-policies/ ip-address-pools-policy[name= ip_pool_policy]/infranet-enforcer] Invalid reference: no 'Infranet Enforcer' object found with identifier 'screenOS1'.	
(PPS) Policies > Enforcer > IPSec Routing	Policies > Enforcer > Connection	Import of configuration from Pulse One returned an Error: Failed to resolve path references. Import of configuration from Pulse One returned an Error:[/uac/infranet-enforcer/ipsec-routing-policies/ ipsec-routing -policy [name= ipsec_policy]/infranet-enforcer] Invalid reference: no 'Infranet Enforcer' object found with identifier 'screenOS1'.	
(PPS) Policies > Enforcer > Source Interface	Policies > Enforcer > Connection	No error message. Enforcer is a required field for Source Interface Policy.	
Pulse Secure Client > Connections	System > Configuration > Certificates > Trusted Server CAs	Import of configuration from Pulse One returned an Error:[/users/ junos-pulse/connection-sets/connection- set[name=PPS_PCS_Combo]/connections/connection [name=L2_Connection_WIRED]/trusted-servers/trusted- server[dn=ANY,ca=PMDRoorCA]/ca] Invalid reference: no Trusted Server CA' object found with identifier 'PMDRootCA'.	Configure the appropriate Trusted Server CA' under System > Configuration > Certificates > Trusted Server CAs, by importing the Trusted Server CA'.
(PPS) Auth > Realms > Users	Endpoint Policy > Network Access > Radius Attributes	Import of configuration from Pulse One returned an Error:[/users/ user-realms/realm[name=TestRealm1]/authentication-policy/radius- request-attributes-policies/selected-policies] Invalid reference: no 'RADIUS Request Attributes Policy' object found with identifier '2 <sup>nd</sup> Request Policy'.	Configure the appropriate 'RADIUS Request Attributes Policy' under Endpoint Policy > Network Access > Radius Attributes.
