About this Release

New installation

Before performing a new installation of Workspace Control 10.2.600.1, please read the following release note carefully:

Installation: Updated ActiveReports components

As of RES ONE Workspace version 10, the third-party components for ActiveReports have been updated to address a security vulnerability (CVSS v2 Base Score: 8.8).

The ActiveReports components (libraries and object code) included in this release, is proprietary to Data Dynamics, Ltd. (acquired by: GrapeCity, Inc.). End-User by downloading and installing this release assumes and accepts sole responsibility of the use of the ActiveReports component and will not act contrary to license terms applicable and available via http://arhelp.grapecity.com/webhelp/Legacy/AR2std/HX_License_Agreement_and_Limited_Warranty_M.html

Datastore

This table shows the Ivanti Workspace Control version that introduced the Datastore revision level that applies to Workspace Control 10.2.600.1

Datastore revision level	Introduced in
13	RES Workspace Manager 2014 SR3

When installing this version, if the Datastore is of a lower revision level, it will automatically be updated.

Drivers

This table shows a list of drivers and when they were last updated.

Driver:	Last updated in:
FileGuard	Workspace Control version 10.2.0.0
ImgGuard	Workspace Control version 10.2.0.0
NetGuard	Workspace Control version 10.2.0.0
RegGuard	Workspace Control version 10.2.0.0
RESNFLT	Workspace Control version 10.2.0.0
AppGuard	Obsolete as of RES ONE Workspace verion 10.1.0.0

If you are upgrading from a version that is older than the highest version in this overview, a reboot is required to activate the updated drivers.

Example:

Currently installed version: 10.1.0.0

Highest version in the list: 10.1.200.0 (for example)

Version 10.1.200.0 is newer than 10.1.0.0, therefore a reboot is required.

What's New

Ivanti Workspace Control: Microsoft SQL Server Always On compatibility

Workspace Control is now compatible with Microsoft SQL Server AlwaysOn (Availability Groups), introduced in Microsoft SQL Server 2012.

Application Security: Include Workspace Containers at import of file certificates

It is now possible to add Workspace Containers when manually importing an XML file containing a list of certificates. By adding the following section, directly under the <file> section, to each file in the XML file, the file certificate rule is imported into the specified Workspace Container:

```
<workspacecontainers>
  <workspacecontainer>Name</workspacecontainer>
</workspacecontainers>
```

Use the command-line option `Pwrtech.exe /importfilesecurity=<filepath>` to import the file.

For more information about **File Certificates security**, please refer to the **Workspace Control Management Portal Help**.

Application Whitelist Monitor (AWM): Configure the maximum file size to scan

The Workspace Control **Application Whitelist Monitor (AWM)** now has the ability to configure the maximum file size to scan. If a file exceeds the configured file size limit, it will not be scanned.

Application Whitelist Monitor (AWM): Do not scan files with a dot in the file name

The Workspace Control **Application Whitelist Monitor (AWM)** now has the ability to skip files with a dot in the filename if the option **Do not scan files with a dot in the file name** is enabled.

Example: `file.name.txt`

This option can be found in the **Application Whitelist Monitor - Configuration** on the **Scan** tab.

Ivanti Workspace Control: Release Notes removed from the product and software package

All links to Release Notes in Workspace Control now open a PDF that is located at <https://help.ivanti.com>.

Bugs Fixed

The following customer support issues have been resolved in release 10.2.600.1:

Problem ID	Title
64727	Composer: WMstartmenu generates errors during logon and not all configured shortcuts are available in WMStartmenu Document Number: 66638
64563	User Settings: Error log shows clsPFRP.fysnAddFile error: Access to path (%LOCALAPPDATA%\RES\WM\#number#\#filename#.tmp) is denied Document Number: 66494

Resolved in release 10.2.600.0:

Problem ID	Title
64155	Agent: Cache-protection bypass issue
63484	Agent: Force Cache Update on FQDN if NETBIOS fails
63484	Agent: Force Cache Update on FQDN if NETBIOS fails
63651	Agent: Inherit connection settings does not work after new manual install
63489	Agent: Palo Alto Traps causes a delayed start of applications
63473	Composer: %username%\Local Settings folder created incorrectly
63488	Composer: App-V: %APPVPACKAGECURRENTVERSION% variable in the parameter field is not resolved
64565	Composer: "AllowExcelMinimized" stops working after upgrade
64642	Composer: Elevated scripts not running when 'ProtectLocalCache' is set to 'no'
63511	Composer: Error: (PinManager.CheckAndResolveShortcut) in pfwsmgr.exe
63648	Composer: Export Windows 10 StartLayout command box is visible with every logon and logoff
64001	Composer: High-quality custom icons are not published on Citrix XenApp
	Composer: Icons of some redirected folders are different from which the ones Windows uses

Problem ID	Title
	Composer: Shortcut disappears from desktop after placing it on desktop with Workspace Preferences
64640	Composer: Sidekick32.exe process blocked
	Composer: Special characters in Outlook signature not applied correctly
63829	Composer: Tiles not visible in Start Screen when using Windows 10 1507 LTSC
63781	Composer: Variables based on Zones (resolution) are set incorrectly on Citrix XenApp environment
	Composer: Unicode characters are replaced by question marks in Printing Preferences
64078	Composer: UTF-8 encoded .ini files in User Profile Directory are edited incorrectly
