Important Information

New installation

Before performing a new installation of Workspace Control 10.2.700.1, please read the following release note carefully:

Installation: Updated ActiveReports components

As of RES ONE Workspace version 10, the third-party components for ActiveReports have been updated to address a security vulnerability (CVSS v2 Base Score: 8.8).

The ActiveReports components (libraries and object code) included in this release, is proprietary to Data Dynamics, Ltd. (acquired by: GrapeCity, Inc.). End-User by downloading and installing this release assumes and accepts sole responsibility of the use of the ActiveReports component and will not act contrary to license terms applicable and available via http://arhelp.grapecity.com/webhelp/Legacy/AR2std/HX_License_Agreement_and_Limited_Warranty_M.html

Datastore

This table shows the Ivanti Workspace Control version that introduced the Datastore revision level that applies to Workspace Control 10.2.700.1

Datastore revision level	Introduced in
13	RES Workspace Manager 2014 SR3

When installing this version, if the Datastore is of a lower revision level, it will automatically be updated.

Drivers

This table shows a list of drivers and when they were last updated.

Driver:	Last updated in:
FileGuard	Workspace Control version 10.2.0.0
ImgGuard	Workspace Control version 10.2.0.0
NetGuard	Workspace Control version 10.2.0.0
RegGuard	Workspace Control version 10.2.0.0
RESNFLT	Workspace Control version 10.2.0.0
AppGuard	Obsolete as of RES ONE Workspace verion 10.1.0.0

If you are upgrading from a version that is older than the highest version in this overview, a reboot is required to activate the updated drivers.

Example:

Currently installed version: 10.1.0.0

Highest version in the list: 10.1.200.0 (for example)

Version 10.1.200.0 is newer than 10.1.0.0, therefore a reboot is required.

New Enhancements and Improvements

Database: Designated account now supports 2FA authentication

It is now possible to use Designated account with 2FA (smartcard) authentication. The Designated account can be configured at **Setup > Datastore**, in the **Windows authentication** section in the Workspace Control Console.

Bugs Fixed
